

Revision-10-22-95

Dear Readers,

I have post the EMR mind machine article on the Internet for the past ten months. Recently, more evidences have surfaced to prove that this machine does indeed exists. These evidences also prove that the Microwaves frequency of EMR mind machine can also be used as a weapon, and it has already been used to harass and harm many innocent Americans all over the country. The report "Microwaves Harassment and Mind Control Experimentation" published in 1992 describes numerous cases of abuse by the corrupted officers. It is authored by Julianne McKinney, a former Army Intelligence officer.

Even the spokesman of FBI have openly admit that they have received large number of request for assistance from people who believe that they are being "zapped by radio waves" and/or "are hearing voices (inside of their head)." These were all in the report written by Ms. McKinney & it also prove the contents of my original article "Freedom of your privacy & thoughts" is true. Especially, the microwaves voices indeed has been used to drive people mad, the automobiles have been installed the emitters of electromagnetic waves to torture people in cars (in case) which also have been proven by some victims of mind control because they have the same experiences while they're driving (These victims reside from the east of coast to the west of coast.).

Why such kind cases still happen? and are they indeed the victims of cover-up by a small group of corrupted officials? Why isn't our society aware of this? It is a vital issue that is facing our society today. We need your help and the help of any person who live in this society. We hope every citizen will have knowledge of this alarming issue and help to ask the Congress to implement legislation to regulate the use of such machine. It is the only way to preserve our country as a country For the people, Of the people, and By the people. We cannot ignore the danger poses by this EMR mind machine (which also includes the Nonlethal weapon) and the small group of corrupted officers who abuse it on our citizens. It must be stopped and it only can be stopped with the help of responsible citizens like you.

My name is Alan Yu, a former lieutenant colonel in Taiwan National Defense Department. Eleven years ago, I immigrated to the United States and later, I naturalized and became an US citizen. I am writing this letter to inform you of a great threat to human rights and our American way of lives. This grave threat is a device known as the "Mind Reading Machine" (Mind Machine). It has been used to violate the most fundamental human rights guaranteed under the United States Constitutions and the very idea that our Declaration of Independence represents: "Life, Liberty, and the Pursuit of Happiness."

What is the "Mind Reading Machine" (electromagnetic Radiation Mind Machine)?

There are two sources of information from different time and with different political affiliation, but both reported the existence of "Mind Reading Machine."

The first evidence: In the 1970s, the South China Morning Post reported that University of Maryland of United States had invented a thoughts reading machine which can read another person's thoughts. The original purpose of this invention was to help authority to investigate severe car by accidents. It was meant to be used on people who were severely injured in car accidents (those who had enter into coma) to get their accounts of

how the accidents occurred. The CIA quickly learned of this invention and purchased the patent.

The second evidence: In the spring of 1984, I was a lieutenant colonel serving in the National Defense Department of Taiwan. At that time, I read a classified document from the department that I serviced. The document indicated the Military Police Department of Taiwan had purchased the thoughts reading machine from the United States (In Taiwan, it was called Psychological Language Machine). The document was a request to the US for parts to repair malfunctioning machines. Before I left Taiwan, this machine had become the most effective weapon for the security departments of Taiwan., such as the Headquarters of Police Departments, Military Police Department, and the National Security & Investigation Department.

Now let's find out what is this mind machine & how could it be invented?

At the first I think I should explain it, why I deduce this mind machine is the EMR Mind Machine.

(1) the first reason, I know a victim of this mind machine in Taiwan, he was tracked by this mind machine group for a period of time before I left Taiwan. (The victim died for the reason of "heart weakness" when he was 35 years old in 1988. I never believe he died for the nature cause. That's because his health condition was pretty good as I knew & he was the commander of battalion when he died. I would like to deduce that he was attacked by microwaves weapon then induce the "heart attack" or "heart disease". This kind murdered skill had been reported by Dr. Frey according to his experiments. I will describe it later.)

We had discussed that what kind waves should be used by this mind machine.

The conclusion is that it should be a kind of radiation waves which can penetrate the wood, brick, metal, & concrete.

That's because the house or apartment in Taiwan all are built with brick, concert, & metal, even the walls of inside the house or a unit of apartment are all built with brick & concrete. That's because Taiwan is a earthquake area. So except the Mind machine use a kind of radiation waves then can not be used to detect human thoughts in Taiwan by remote way.

(2)The second reason, According to the bio-science, the only radiation waves which has the penetrates ability also relate with human body (body-electric) is the electromagnetic waves.

(3) The third reason, the Russian top institutes on mind control research had been working on electromagnetic waves in 1950s-1960s. It proved that the Russia first discovered electromagnetic waves could be used on mind control. (The POW in Korea had proved that a kind of electromagnetic waves machine of Russia had been used on them when they were interrogated.)

(4) The fourth reason, From the view of MIND Control (human behavior change) experiments procedure of CIA, the researchers had put the electrode with wire in the brain of animal then electric simulate it to find the every precise reaction of brain to build a brain map. Dr. Stephen Aldrich also use the electric or radio signals to remote controlled their subject & implanted the electrodes strategically into the animals' brain.

The another under cover research is that some victims reported they

are implanted the transmitter in their head so that their entire thoughts can be read by the conspirators. Before we discuss the crime of conspirators, at least, we can determine one thing that they still use the radio waves way to remote read the victims' thoughts.

(5) The fifth reason, From the ESB (electrical stimulation of the brain) experiments of Dr. Jose Delgado, it prove the great potential in mind control. There is a radar can find a fly kilometer or track a person at twenty-five miles. So researchers had suggested that using such very accuracy radar to focus EMR beam can bend mind much like the ESB.

(Dr. Becker page 319)

In the mid-1970, Dr. Delgado shifted his interests from ESB to electromagnetic field & the biological affects. He use ELF (Extremely Low Frequency) to induce sleep or manic behavior on monkeys. Also he can use the ELF to change the monkey's emotion which was produced by ESB.

(6) The sixth reason, They can use the microwaves frequency to deliver spoken message to human brain. Also they use the radio waves (electromagnetic waves) to hypnotize people or change their thoughts.

(7) They can use ELF to suppress human thoughts & change human's behavior, motion, or will.

So I believe that this mind machine is ELECTROMAGNETIC radiation waves (EMR) mind machine.

Now let's back to investigate the function of EMR mind machine & how could it can be invented.

There are other sources of information that proves the truthfulness of the previous two report.

The following information comes from the book "The Search for Manchurian Candidate" written by John Marks. It documents the CIA's research and interests in the field of mind control and the human behavioral modifications.

The CIA mind control programs started in 1949 and one of most infamous program was codenamed MKULTRA (Marks, 22).

In December of 1950, Morse Allen, a CIA scientist heard of an experiment with an "electro sleep" machine in a Richmond Virgin Hospital. He purchased the "electro sleep" machine and hope it would allow its operator to induce people into deep sleep without the use of electroshocks or drugs (Marks, 25).

In 1953, Dr. John Lilly, a research scientist working at NIH, was studying the brains. His goal was to find the region of the brain that control each body function. From the use of electro-stimulation, he discovered the precise center of monkey's brain which controls pain, fear, anxiety, and anger. He was also able to locate the part of the brain that controlled the erection, ejaculation, and orgasm in male monkey.

The CIA learned of these experiments and approached Dr. Lilly. Dr. Lilly cooperated with the CIA for a short period of time before dissolving the partnership. He can't tolerate the possibility that the CIA might use his work to develop electronics to remotely control human beings through the use of strategically implanted electrodes in the brain (Marks, 142 - 143)

In 1959, Dr. Allen Frey reported that microwaves frequency can be used to deliver message, even the deaf people can hear it.

(according the research paper of Dr. Frey.)

In 1960s, CIA found that KGB beamed low frequency electromagnetic waves to the Embassy of US in Moscow. This agency worried this might be another Brain-Wash to US officers then started research the electromagnetic waves in mind control.

At same time, Dr. Stephen Aldrich, working in the Office of Research Development of CIA, picked up the work began by Dr. Lilly. His group made many breakthroughs. These breakthroughs allowed them to remotely control the movement of their subjects through the use of electrodes implanted in the brain of animals (and probably men).

In 1961, they were able to report that "We now have production capability." In November 1961, a CIA document stated that: The remote control of activities in several species of animals had been demonstrated [blacked out] The evaluation will be conducted of these techniques toward man (Marks, 209).

The above information prove that the agents of CIA or the Mind machine operators indeed have the enough knowledge to hurt a human brain by their invisible radiation waves in various way if they so desire.

Since 1960, seven laboratories of Russia had been opened throughout their study of the phenomenon. Mr. Kogan, the chairman of the Bioinformation Section of the MBPS, was carrying out experiments on distance mental suggestion, long-range, inter-city telepathy and awakening a subject from a hypnotically induced sleep by "beamed" suggestion.

Other Soviet research is into tapping the electrical field known to be emitted by the human brain, both to read the thoughts & control them (Freemantle, page 98 of "CIA")

The above information shows that the KGB had started using electromagnetic radiation (EMR) as the tools to read thoughts in their machine. Since the CIA was aware of these technologies, then it will be logical that the CIA would improve but use similar technologies. Since scientist who's behind in research will always learned the knowledge from those who are ahead.

If the Russian had succeeded in using the electromagnetic radiation (EMR) as the tool to read human thoughts, then I do believe the CIA would use the same technologies because it is invisible, wireless and leaves no evidences.

In this program " MKULTRA" of CIA, not only the university of Maryland and Georgetown were used in the experiment of human behavior control by CIA from 1950s-60s. Eighty institutes which included universities had been used by CIA in this program.

This Agency also supported budgets to make the investigation of the human ecology in medical research. The human ecology research extended to the Canada after 1967 for the aegis of Society for Investigation of Human Ecology.

Except the above events, a special report is that Mr. Gottlieb, the director of CIA technical service, destroy all of CIA's record of mind control program in 1973 and claim to have forgotten all research details and information when he testified to the US Senate in 1977.

(Above information were excerpt from the Washington Post's article published on august 3, 6, 18, and Sept. 2 in 1977.)

The above information indeed prove that the CIA cooperated with lots Universities to research about Mind control, and it might be one of these Universities which invented the original "Thoughts Reading Machine" for the CIA.

I would like to deduce that the researchers of these Universities might not have totally understand that their experiments were related with the Mind control research program of CIA. Chances are, only the head research of some of these Universities knew the truth about their research. So, when one of these Universities invented the "EMR" mind machine and transferred the patent to the CIA, some of the misled researchers (those who were unaware of the ultimate use of their research) felt betrayed and leak out the information to the press.

That's why the South-China newspaper reported this event on news and that's why Dr. Gottlieb wanted to destroyed all of their Mind control program records because they already invented the "Thoughts Reading Machine" prototype (The old Mind control program used the electro sleep machine, the electrode stimulation brain, and the EEG beside the electric shock, but right now they changed to use the electromagnetic radiation waves to detect human thoughts).

This logical explanation answer and solve our questions about mind machine.

Now, I would like to mention Dr. Becker, who is a medical doctor with a long term research experiences in bioelectromagnetism. He had been nominated twice for the Nobel Prize because of his contributions and his work. He stands on the top in the field of research on regeneration and especially has professional knowledge of electrical current in living things. In 1985, he wrote a book titled "The Body Electric" which mentioned many of the CIA's mindcontrol experiments and their goals.

Now, I would like to show you some information about the "TRM" from his book.

The electromagnetic mind control was researched by CIA starting early 1960 (Dr. Becker agrees that this mind machine use the electromagnetic waves).

In the infamous program-" MKULTRA" , this Agency used various way which included hypnosis, psychedelic drugs..etc. to surveillance and interrogation. The purpose was looking for adapting bioelectric sensing method.

This mean that they want to find the remote electric technique method to control the activation of human organism.(I'll explain this with example later.)

In 1974, they're very strongly interested in the hypnosis-EMR. The experimenter of this research, J.F. Schapitz recorded :

The spoken word of the hypnosis may also be conveyed by modulated electromagnetic energy directly into the subconscious parts of the human brain--i.e., without employing any technical device for receiving or transcoding the messages, and the person who expose in such influence has no chance to control the information input (Becker, p. 320-321).

On September 21, 1977, the sub-committee on health and scientific research of Senate asked the director of "MKULTRA" -- Dr. Sydney Gottlieb to testify. Dr. Gottlieb said: "There was a running interest in what effects people's standing in the field of radio energy have, and

it could easily have been that somewhere in the many projects someone was trying to see if you could hypnotize somebody easier if he was standing in a radio beam."

The US Congress members should have asked them at that time, why were they so interested in trying to hypnotize somebody in a field of radio energy (or in radio beam) but not in the ultrasound field? (There is another ultrasound mind machine which was invented by Russia.--the detail information will be reported later).

The only reason should be that they had found they could use radio waves (microwaves) to imitate, or communicate with, and interpret human thoughts. So, they want to use the same theory to change human mind (thoughts or behavior) by radio waves (microwaves) but not ultrasound (the current technology used in the Russian Mind machine).

The above information show that the Mind machine-"T.R.M." should already be invented in 1973. This is because their steps (knowledge and actions) already have went beyond to simply detect the thoughts in 1974.

In 1974, the CIA was researching into techniques to change or influence human thoughts through the use of hypnosis. It will be ridiculous for them to research into changing or influencing human thoughts unless they can read human thoughts. Unless, they already have the abilities to read human thoughts, then the CIA can not be completely sure if they were successful. It will be difficult to see if someone's thoughts were changed by observing their behaviors because there's a great deal of uncertainty.

Only when they have the abilities to read human thoughts, can they be 100% sure that they have changed the thoughts in the subject. Therefore, the CIA should have already possessed such abilities in 1973.

Especially in 1973, Dr. Sharp serving as a test subject himself, heard & understood spoken words delivered to him in a echo free chamber via a pulsed-microwave audiogram(an analog of the word's sound vibrations) beamed into his brain. It did proved that the device mind machine-"TRM" indeed succeeded.

Thoughts are just the voice-less (unspoken words) "language" inside the brains. Language express thoughts with voices. When a person think or speak the same phrase (like "How are you?"), the electrical representation (electrical impulse) of the thoughts or the speech inside the brain should be the same.

The above experiments of Dr. Sharp proved that they could use the microwaves to deliver message (spoken words) to human brains (the electrical impulses which represent the voices).

Based on the above evidences and logic, then they should be able to do the reverse (read a person's thoughts by decoding the electrical impulses [brain waves] inside the person's brain into language).

This is because to deliver a message using microwaves, they must translate spoken words ("How are you?") into electrical impulses (brain waves) which can be interpreted as voices by the brain (like "How are you?"). If they use microwaves to deliver the message to you, then you can hear the voice in your mind (brain).

The only difference will be that the voices is not "your voices", but it is as if someone else is speaking (whisper) in your mind ---Other person's thoughts is delivered to your mind in language way but no normal

voices can be heard by ears.[because it's not sound waves].

Then they certainly can (read) interpret the same electric impulses patterns (brain waves pattern such as the phrase "how are you?") from human brain into language (words as "How are you?"). However at this time,

your thoughts will show up on computer screen as words (voice-less language) if the collected brain waves is sent to CPU, or if they send your brain waves (through the use of microwave radiation electronics devices) directly into another person's brain, then you might whisper to the other person's mind (without "normal voice") [In other words, the other is sharing your thoughts].

So based on the same logic, if they can use microwaves to imitate the electric impulse which describe the language & deliver to human brain, then on the other hand, they also can interpret the same electric impulse back to the same language. It must be the same thing.

According to above analysis, they should be able to decode as many electric impulse patterns (brain waves pattern which describe thoughts, language) as they can deliver the message to the human brains. That mean if they have no problem to deliver messages (through the use of microwaves they can build the microwaves brain waves pattern), then they should also have no problem to read human thoughts (through the use of microwaves to read the brain waves pattern [electric impulse] then interpret to languages.).

There was a research which had used the same logic as above & had been practiced in a mind reading. I would like to show you this kind information.

In 1975 a primitive mind reading machine was tested at the Stanford Research Institute. The machine used a computer which recognizes a limited amount of words by monitoring a person's silent thoughts. This technique relies upon the discovery that brain wave tracings (EEG) show distinctive patterns that correlate with individual words - whether the words are spoken aloud or merely subvocalized (thought of).

(Walter Bowart: Operation Mind Control. 1978 p. 268.)

This kind research indeed prove that they should have had the ability to read human thoughts via microwaves frequency since they can use the microwaves frequency to deliver message to human brain in 1973.

(According above way, if each different word has different brainwaves pattern then create three or even ten thousand popular words from the brain waves pattern, can build a dictionary of human thoughts in CPU to interpret the brain waves--read the thoughts.)

However the only exception should be that when the brain waves (electric impulse) which describe vision. That's because this visual information encode in brain much like to interpret picture (sense) than thoughts. So that's why CIA needed to collect human brain waves which interpret visual information after 1973.

Furthermore, the director of CIA technical service destroyed the full record of mind control in 1973. It prove that they already succeeded and invented the "Thoughts Reading Machine" (This device might be invented from the cooperation with other University.) in 1973, otherwise they would not destroy the records of their valuable programs except they totally gave up the mind control research. (However the evidence showed they didn't give up the mind control after 1973.)

These information would be vital to continue their research on mind control. The logical reason for destroying all the records is that they have already invented this "Thoughts Reading Machine" or had obtained the mind machine-"TRM" device from a cooperated University.

By destroying the records, it will be difficult to reproduce experiments that were done, and it will be nearly impossible to prove that they have invented and have these type of mind machine.

The action of CIA to destroy all records also shows that the agency should have found the correct method to read human thoughts (using the electromagnetic radiation waves as the thoughts detecting tool.) but not drug or electric shock, or even they gave up on implants and electrode stimulation brain (EMB). By destroying the records, the CIA have tried to ensure that there will be no security leaks.

Especially, comparing with their action one can see that CIA didn't give up the goal to change human behavior after 1973, it is also appears that the agency was advancing their technologies with experiments in field such as hypnosis, emotion change, etc. since 1974. Also the delivered message were totally changed to use (focus) the electromagnetic radar waves (EMR).

This prove that they already found the right way to use the (focus) EMR to detect thoughts or deliver messages and It indeed succeeded in 1973.

So Dr. Gottlieb still led the human behaviors control and the Director of "MKULTRA" plan program after 1973.

In 1974, the lots research experiments of CIA already prove that they can send spoken words, subliminal message ,or hypnosis by the electromagnetic radar waves (EMR) to change the human behavior.

(See "The Body Electric" on page 320-321)

The experiments appear that they not only didn't give up the mind control but advanced the device thoughts machine from their technique of experiments.

It did prove that the "Thoughts Reading Machine" should have invented from the original electro-sleep machine and had advanced as a mind machine to change human behavior in 1973.

Also the collected information prove that the Russia used the electromagnetic waves as their mind machine tool.

In 1983 there was a public meeting at Loma Linda Va hospital and released photos, information concerning a Russian Lida machine.

This small transmitter could emitted 10-hertz waves for tranquilization & more better suggestibility. Such similar machine had been used to POW in Korea. (The above information prove that Russia used the same idea --the electromagnetic radiation waves as the hypnotic delivered tool.)

It show that electromagnetic waves or radiation waves indeed are the thoughts Detected tool of US Mind machine.

On the other hand, I would like to deduce that the original result wasn't so good in a year experiences of using this device (machine) when I compare with their research experiments at 1974. In 1974-1977, they were full interesting in how hypnotize a person & change one's thinking with the EMR.

(According to the testify of Dr. Gottlieb in Senate)

They should find that only to keep people sleep (dreaming) or think then

to read human thoughts would spend lot of time to collect useful information.

That's because they need to wait the subject think about the information which they need. Even the operators can push the subject to keep sleeping (dreaming) or thinking by their machine, but how could lead the subject's thoughts toward the needed information still a problem to them at that time.

To detecting a person thoughts in such condition, the machine operator would feel boring(without patience) & tired to keep their eyes on the screen of "EMR Mind machine/TRM" because lots information might be useless or purely belong to one's regular life.

That's why they're so strong interested in hypnosis-EMR interaction in 1974, because they need the skill to change human thoughts while they're thinking.

So I would like to deduce that the original "Mind machine/TRM" was invented in 1973. (Or the CIA may got the mind machine device patent from the cooperated university this year in 1973.)

On the other hand, I recently read a very valuable information which was written on the book "Zapping of America"--author, Paul Brodeur. It mentioned that a insider information had been reported by National Enquirer on June 22,1976. It said that Since 1973 the Advanced Research Projects Agency had been sponsoring a program to develop a machine that could "read minds from a distance" by deciphering the brain's magnetic waves.

A scientist involved in the program had declared that the ultimate goal of his work was to exercise control over the brain.

I will deduce that the above news is a fact basically. Why? I would like to explain it to you,

This report mentioned this mind machine read mind from distance by deciphering the brain (electric) magnetic waves is exactly same as the research of the CIA mind machine, besides the time point out on 1973 is also correct as the fact or as my deduction. So I deduce that In 1973, the Advance Research Project Agency was noticed that the EMR mind machine had been invented by CIA then it provided the budget to CIA for the further research, so it was sponsoring the program to CIA to continentally develop the mind machine.

Only the CIA EMR mind machine had been invented then the scientist involved in the further research program could & dared to declare that "the ultimate goal of his work was excise control over the brain."

If the EMR mind machine can not read human thoughts then they even don't know how much time they need for figure out the basic problem --understand other person's thoughts, then how could they had chance to exercise over the brain.

So I believe this news is true & was offered by a researcher who worked with this program. Then why this researcher didn't give the information to a major newspaper but offer to the "National Enquirer" newspaper?

From the view of security to analysis, it is still reasonable. Why? Let me explain it to you.

If a researcher of this program want to notify the society of the hidden danger of this research. (That's because a mind reign machine will be definitely used to invade the privacy & thoughts of people.)

He will more likely to go to a smaller newspaper. Why? That's because any normal human being want to protect himself first, a major

even can fax a picture in the CPU then send to a subject in his dream or thoughts to lead a subject's thinking in dream or influence one's thoughts.

So this research is from the physically contacted way (with wires-electronically probes brain) to obtain people's brains patterns in vision which could be developed into a different part of brain waves program to interpret visual information of human.

So comparing with above evidences, I would like to deduce that the EMR mind machine should have been invented in 1973.

Another important information concerning the research for the construction of mind machine was provided by a Professor Mr. James Craven who's from the Clark College in Vancouver. He noted.

During the 1970s, a man name Arnold Zubeck at the University of Manitoba (Canada) was doing work in the areas of sensory deprivation and interrogation/Mind control techniques and work in the areas of electromagnetic waves (microwaves) and their influence on synapse processes in animals and humans.

His work was financed by the Canadian Defense Research Board, the US Army and the British Government. Zubeck's work was cited in the Copton Report which was a report by the British Government on interrogation techniques in Northern Ireland. There was widespread protests by students against the work of Zubeck who later committed suicide.

This indicate the real purposes and intentions of research in the areas of mind control, electromagnetic wave influence on human physiology etc. This work is ongoing and those academics who are participating in it are like the German chemists who made gas for the gas chambers. They have made Faustian bargains with the most ugly and evil forces to come along for a long time.

This evidence shows that the EMR mind machine "T.R.M." does indeed use electromagnetic waves to read the thoughts of others. This concept had been accepted by many scientists in the world.

Scientist Jose Delgado had proven the effectiveness of electromagnetic waves for mind control through his experiments on animal subjects.

An ESB type of signal had been used by Jose Delgado made monkeys turn their heads, or smile, no matter what else they were doing at the time. This experiment was performed up to twenty thousand times in two weeks. In the end, Delgado concluded, "The animals looked like electronic toys."

This type of research suggests the possibility of forcing others to perform acts against their wills. It might be possible for normal everyday people to be turn into assassins if ESB signals are sent into their brains.

Other research shows that EEG combined with radio frequency and microwave broadcasts may be able to produce specific thoughts or moods, such as compliancy. It might be used to create an totalitarian government without the terror: "Tyranny without the terror". It poses a great danger to the entire society (Becker, 320).

Above information show that the use of electromagnetic waves is the main techniques for "TRM"-mind machine to read human thoughts. When Dr. Becker was still working on his research, the EMR mind machine should

have already been invented for a long time. From analyzing all the research goals of these scientists, it is apparent that they had already surpassed the mere understanding of human thoughts through the use of EMR. Instead, their goal was to alter human minds and develop techniques to control them (They can't try to alter someone's mind without first understanding what the person was thinking in the first place) and to advance the microwave technology as a weapon (with the potential to be used as device of torture).

There's another source of information to further proved that the technologies to read thoughts has existed for a long time. Dr. Josh Backon is from Israel, and his account deals with the invention of mind machine in Israel. He states:

"This brain reading device was originally developed by a mathematician (now in Israel) working with Professor Bechtereva at the Military Medical Institute in Leningrad (Russia) in the mid to late 1970's.

The mathematician decoded MUA's (multiple unit activity) of certain brain wave patterns and got the phonemic representation of the word- the subject was thinking on a computer screen. If I were thinking the word CAT, this word would appear."

If the Russia can develop a method to decode the brain patterns into words that can be display on a computer screen in 1970s, then US should be able to do it as well.

Another source also points out that US does have this type of device.

In 1988, Mr. Fratus reported, in the Utah state prison, he was met such device which could read his entire thoughts in remotely.

(See the personal report of Mr. Fratus from the Utah state prison.)

The testimony of Mr. Fratus had already the EMR mind machine indeed invented & existed for a long time since 1988.

In 1989, a US defense consultant & contractor talked to Ms. Armen Victorian that: he was asked to examine the possibility of devising operation method of TRANSMITTING SUBLIMINAL MESSAGE THROUGH THE TV SCREEN. (See June, 1993 "Lobster" magazine of UK)

If they need the technique to transmitting subliminal message through TV screen, It mean they not only can read the thoughts on the screen but try to influence the subject thoughts through the TV screen then can easily find the information which they need.

This action shows that the scientists already can send subliminal message by a inconvenient scientific technique, but they try to change it to a convenient way which can be easily used by the science-illiterate people --operators of "TRM".

Now, do you still believe that there is no EMR mind machine -"TRM" in the United STATES?!

According to the news report of Hong-Kong, the classified document of Taiwan, the "T.R.M." have been invented & used for a long time.

Furthermore, from analyzing CIA's research goal in the 70s & the Copton report, indeed proves they had already gone beyond reading human thoughts and were moving toward human behavior control and modifications.

This means that "TRM" indeed had been invented and with some

experimentation, they can advance the technologies to modify human behaviors. This also prove that the news report, the classified document are both true. Also, the readers should be reminded all these occurred in the 70s to early 80s. It is a frightening to consider what they have been able to achieve since then, and what further advance and weapons had they developed in the past decade.

When I compare Dr. Becker's report, Mr. Craven's words, and the experiences of the victims who I know, the testimony of Mr. Fratus and with the facts (The "TRM" has been invented and used for a long time, but many people aren't aware of this device), I should say that the "TRM" mind machine does use invisible electromagnetic radiation waves to read human thoughts and that's why people aren't aware of it.

Some people thinks that if you stay at home, you are safe. How can anyone operate the machine on you if they can't find where you are?

I would like to explain it to you as below:

This machine includes a "remote watching" equipment. The "remote watching" equipment will locate the subject and then the machine will be used to read the subject's thoughts. This "remote watching" equipment uses a kind of advanced radar and emits radiation waves that will penetrate concrete or wall to find and locates the subject accurately with surgical precision no matter day or night.

This "remote watching" equipment is a secret technology of the intelligence agency. A company known as PSI-TECH specializes in this technology. It is discussed in an article written by Armen Victorian (The article appeared in Great Britain's magazine, "LOBSTER", in June of 1993. This magazine specializes in the reporting matters dealing with intelligence agencies and conspiracies).

The PSI-TECH had used the "remote viewing" to locate Saddam's scud missiles sites for US government during the Gulf War and assisted FBI to locate a kidnapped Exxon executive. They even can find a object from other country or locate kidnapped people in the hidden place. This proves that this kind technology of "remote watching" to locate a subject in a building, is not a problem to them.

Now, I would like to show you another information about electrical surveillance system which is a type of implantable/injectable micro/Bio-chip. It's as below:
(attachment)

Date: Sat, 17 Jun 1995 20:33:33 -0700

BIG BROTHER'S IMPLANTABLE/INJECTABLE MICRO/BIO-CHIPS

>From an Oct. 11, 1993 "The Washington Times" article entitled, "High-tech national tattoo", by Martin Anderson: "...there is an identification system made by the Hughes Aircraft Company that you can't lose. It's the syringe implantable transponder.

According to promotional literature it is an "ingenious, safe, inexpensive, foolproof and permanent method of ... identification using radio waves. -----

A tiny microchip, the size of a grain of rice, is simply placed under

^^

the skin. It is so designed as to be injected simultaneously with a vaccination or alone."

How does it work? Well, the "chip contains a 10 character alphanumeric identification code that is never duplicated. When a scanner is passed over the chip, the scanner emits a 'beep' and your ... number flashes in the scanner's digital display."

[....] True, an implanted transponder can't yet hold anywhere near as much material as a smart card. But if the desire is there, larger size implants and tiny microchips could soon increase its storage capacity.

Of course, most Americans will find a surgically implanted government microchip repugnant. At least for the foreseeable future, the use of this ingenious device will be confined to its current use: the tracking of dogs, cats, horses and cattle.

But there is no difference in principle between forced to carry a microchip in a plastic card in your wallet or in a little pellet in your arm. The principle that Big Brother has the right to track you is inherent in both. The only difference is a layer of skin.

>From the Sat., Oct. 15, 1994 Dr. Fox "ANIMAL DOCTOR" column in the "St. Louis [Missouri] Post-Dispatch":

Dear Dr. Fox: Our local Humane Society has offered, for \$25, a lifetime computer chip to be injected with a needle between the shoulder blades of a cat or dog. Apparently, all new animals adopted get a chip. [....]
[....]

[Dr. Fox:] ...the microchip identification system you describe is an excellent advance in helping with pet loss, owner identification and pet theft. [....] Microchip ID technology is safe...and adverse reactions following subcutaneous implantation are extremely rare...

>From the "Electronic Leash:
The Implantable Bio-Chip Is Already Here. Is Big Brother Just Around The Corner?"

article by Lisa Crosby in the Vol. 11, No. 14, June 15-June 21 issue of the "Tucson [AZ] Weekly":

[....] The size of an uncooked grain of rice, the silicon computer chip...When inserted underneath the skin, this chip can link an individual to a computer database, or it can track a person's location via satellite.

[....] Sound impossible? Hardly. Microchip implants are in use as you read this. [....] Today, injecting a microchip into animals is routine.

[....] [....] Microchip pet identification -- technically known as radio frequency identification (RFID) -- is available to pet owners nationwide.

[....] [....] The concept seems simple. A microchip encased in biomedical-grade glass and imprinted with a unique, unalterable alpha-numeric code. Over 34 billion individual code numbers are available. [....] Once implanted, the chip is virtually impossible to remove. ... even surgical removal using advanced radiograph techniques is extremely difficult. This is because fibrous tissue adheres to grooves in the glass surrounding the chip to prevent migration of the chip...

several pending measures before Congress calling for a social security card for immigrant identification with a photo, fingerprint digitization, or bar code. [....]

.. The injectable microchip has been equated with the "Mark of the Beast" -- a reference to a Biblical prophecy predicting that only those with a mark on the right hand or forehead in the End times will be able to buy or sell. (The supercomputer in Brussels handling worldwide bank clearings for the Society for Worldwide Interbank Financial Telecommunications is nicknamed "The Beast.")

(Related "bio-chip" information, as follows, is also contained in the 1994 book [ISBN 0-679-43176-4], Saved By the Light: The True Story of a Man Who Died Twice and the Profound Revelations He Received, an autobiography written by Dannion Brinkley.)

* Steve Wingate / CITIZEN'S INTELLIGENCE ACCESS BBS / 415.927.2435 / MindNet

The above information already proves that to track a animal, car or even human is not a problem.

Also comparing with my experiences in Taiwan, there are central control stations that coordinate the use of the machine in major cities of Taiwan. These control stations are connected to sensors in the streets. So, they can track down someone anywhere within the city. If Taiwan has this type of machine control stations, United States should have the similar control centers. I suspect that these station might use the "remote viewing" technology to locate anyone they're tracking on. (and this technology may have been included in city design).

Therefore, a person can be located anywhere in the city,

I would like to show readers some evidences to prove what I said are true.

There are eight of such kind cases had been reported in the " Microwaves harassment & mind-control experimentation". (See page 8, 9 on electronic surveillance project- Author Julianne Mekinney December 1992) (Attachment)

One dividual (driven to extremes of stress by ongoing electronic harassment focusing on her children) killed one child in an effort to protect her from further pain.

Another individual, during a telephone conversation, was told by an employee of a local power company that , if she value the lives of her children, she would drop the her opposition to the company's installation of high power lines. Since receiving that threat, the individual 11-year-old daughter has been reduced to extrement of illness which cannot be diagnosed. It's now also apparent to this individual that her three-year-old son ids on the receiving end of externally induced auditory input. (DoE figures prominently in this case.)

If the Department of Energy is really involved in above case then what facts will it show us? It proves that few Departments of our government indeed use this EMR mind machine or at least use the invisible microwaves weapon.

In this cases, the family didn't receive message which directly deliver to their brain by Mind machine operators. You might ask what's the real reason? In my own opinion, I would like to say that these families basically shouldn't be their torture subject of mind machine operators because they're under control. However, once these family member's action or position oppose the interest of the mind machine group then mind machine operators still can use the invisible microwaves weapons (direct energy weapons) to hurt these victims' children then black mail them in opened way (call these victims by telephone.).

The above information also proves that none place is safe when you live under the EMR mind machine surveillance system. So even the above children of average families who lives at home or even stay at hospital, the children still can't avoid to be hurt by the remotely control invisible microwaves weapon (or direct energy weapon) if the mind machine operators wanted to.

These parents can't do nothing to help their children or protect from pains, one grieving mother killed one of her child to protect child from further suffering. This kind situation only proves that the EMR mind machine surveillance system have already been established & network whole nation. Also the invisible EMF waves (microwaves) weapon can remotely control the emitters then focus waves to hurt anyone in any where.

(The emitters should be designed as a new electrical parts which combine with old parts as a new parts so it not only has the original parts function but also can emit radiation waves by remotely control way.)

The above evidence also show that actions of Mind Machine Operators are extremely evil.

Not only will they read your thoughts, but they will also harm your body with their invisible Electromagnetic radiation weapon. By doing so, they can decide how bad your body condition is or in what health condition they will allow you to live. Their action is more terrible than those of Stalin and his philosophy, Stalinism, in Russia. The Stalinism only determine the distribution of material ("the redistribution"), but the mind machine operators will distribute other people's life or their health condition because they can use invisible electronic radiation waves (or direct energy weapon) to hurt your body in your homes, cars, or everywhere according to their remote control ability & entire nation network surveillance system.

Before I express my opinion to the Mind machine working way, I would like to mention a Military & intelligence advisor- Mr. Harold Wolff. He distinguished some special methods into more relevant to subversion, seduction, and interrogation.

Mr. Wolff also collected this kind experiences from the CIA's file such as "threats, torture, coercion, imprisonment, isolation, deprivation, humiliation, brainwashing, black psychiatry, hypnosis, and combined these as the basic interrogating theory & skill. He offered to study these method too.

(page 149 -John Marks)

So the Mind machine basic operated theory & skill of CIA included above all methods & the knowledge of brain map, neuro-science, etc.

Since they had sold the mind machine to foreign country, they had built a big area mind machine surveillance system in these countries. Also the same machine operated theory & skill was learned by other country machine's operators as a common sense to protect their mind machine as a top secret.

So the actions of machine operators are always cruel when they're staying at the central machine control station or using their mind machine to get rid of anyone.

According to their basic operating theories, skills, training, and personalities, the operators appears to others as the following:

- (1). They have different standards with the current law of our society to distinguish who's good or bad.

The normal societal standard is to protect law abiding citizens and punish those who have broken the law in our society. Comparing this standard with that of the mind machine operators, one find that the standard of the operators are almost completely opposite of the normal society.

The operators distinguish people who's good or bad according their special rule and never consider the current law. The criminals might be good people to the machine operators if the operators can predict the action of the criminal, read the thoughts of the criminal, and the criminal is not opposing the interest of the mind machine group.

Also, the operators won't hurt the criminal in any way to avoid security leak. On the other hand, a law abiding citizen might be considered a bad people by the operators if the operators can't predict the action of the law abiding citizen and the law abiding citizen somehow oppose the interest of the mind machine group.

Also the machine operators will try to get rid of the law abiding citizen in any way to avoid the mind machine security leak.

- (2). The Machine operators always have "two faces" or have been trained to have "multi-personalities"

When the mind machine operators are living in their homes, they act as if they are completely normal just like any common people. They follow the laws, talk to you as friends, and have their families and kids just like any average person.

Yet, when these people are on the job (working at the central machine station or using their mind machine to carry out their jobs at home), then they act as if they were completely different people. It is as if their personalities when from normal to something horrible, without honor, moral values, and respect for human rights and lives. It is as if these people have a different personalities, and they assume this personalities when they are on the jobs.

The machine operators assume the position of power and show their "darkside" to the subjects. These machine operators will torture, abuse, threaten, coerce, humiliate, seduce, brainwash, etc, the subject. Also, they will abuse the invisible radiation wave as a weapon (and/or the so-called "non-lethal" weapons) to get rid of the subjects when the subjects become out of "control."

- (3). Most of the mind machine operators treat themselves as the master of people or the first class citizens, especially when they're staying at the

central machine station or using the mind machine at any place.

For those people who are under their (machine operators) handle, the operators regard these people as their "kids." These "kids" may live peacefully in the society for the time being as long as the "kids" do not anger them, and the "kids" do not present a threat to machine operators' interests.

The operators can watch any people inner secret or read people's thoughts, also they can hurt the people by their invisible radiation waves without knowing from the people. The people are totally under their control and are ignorant of this situation. Without public awareness, any law to constraint their actions, or a regulating commission to check on the mind machine operators, they are free to do whatever they want. It doesn't take long for these operators to regard themselves to be "above the law", and "untouchable." No longer, will they believe they are the public servants. The machine operators will regard themselves to be first class citizens or the master of the people.

As the old adage of "power corrupts", most of the operators have enjoyed unauthorized power and for way too long. They think they can do anything and will never be held responsible because their tools use invisible radiation waves that leaves no evidences. They can hurt and "get rid" of anyone without fear of being arrested because there are no evidences to prosecute them with.

(4). In a way, the philosophy of mind machine groups are very similar to the philosophy that "there is no nation boarder" of the Europe Common Market. However, the philosophy of the mind machine group is applied to political security instead of economics.

The Mind Machine operators are the very special group (beyond the government) and actually you can say that while the machine operators carry out their job, they don't belong to any country. That's because they don't care any law or constitution of any country to deal with their job if anything which affect the interest of the Mind machine system.

The operators of the Mind machine group (system) will help any country to get rid of anyone if anyone can cause the security leak of the Mind machine.

So a female victim of Taiwan who had been harassed by Taiwan Mind machine group, although had moved to US but still met the same situation in US. (The detail will be described later.)

On above situation, any other foreign country machine operators would co-detect the naturalized US citizens & exchange their file of information.

(5). The evil belief of EMR mind machine operators is that when there's a whip, there's a way.

The security of mind machine system is considered by the machine control group above the constitution of their country.

So they do everything follow this group special operating way. Their actions appeared that they only believe forces and always use their invisible radiation waves as a weapon to force victims to follow their intention.

That's only because these radiation waves are invisible, noise-less (except the painful howling of victim), no external injuries evidence, & without physical contact, so there is no trace of any evidence of their

crime. They are never held responsible by law.

Since they don't pay any responsibility to their crime, their evil belief is that there's a whip then there's a way.

They usually used this way such as torture, humiliation, threat, blackmail, or brainwash, etc. to hurt you & force you to follow their order.

(6). The Mind Machine Operators are practicing Stalinism.

Not only will they read your thoughts, but they will also harm your body with their invisible Electromagnetic radiation weapon. By doing so, they can decide how bad your health condition is or in what health condition they will allow you to live.

Their actions are kind of Stalinism in Russia but getting worse. The political Stalinism only determine the distribution of material ("the redistribution"), but the mind machine operators will allocate other people's life (live or die) or distribute their health condition because they can use radiation weapon (nonlethal weapon) to hurt your body in your homes, cars, or everywhere according to their remote control ability & entire nation network surveillance system.

I would like to show readers some evidences to prove what I said are true.

There are eight of such kind cases had been reported in the " Microwaves harassment & mind-control experimentation". (See page 8, 9 on electronic surveillance project- Author Julianne Mekinney December 1992) (Attachment)

 One individual (driven to extremes of stress by ongoing electronic harassment focusing on her children) killed one child in an effort to protect her from further pain.

Another individual, during a telephone conversation, was told by an employee of a local power company that , if she value the lives of her children, she would drop the her opposition to the company's installation of high power lines. Since receiving that threat, the individual 11-year-old daughter has been reduced to extremment of illness which cannot be diagnosed. It's now also apparent to this individual that her three-year-old son ids on the receiving end of externally induced auditory input. (DoE figures prominently in this case.)

 If the Department of Energy really involved in above case then what facts will show us. It only proved that few Dep. of government indeed use this EMR mind machine or at least use the invisible microwaves weapon.

In this cases, the family didn't receive message which directly deliver to their brain by Mind machine operators. You might ask what's the real reason? In my own opinion, I would like to say that these families basically shouldn't be their tourture subject of mind machine operators because they're under control. However once these family member's action or position against the interest of the mind machine group then mind machine operators still can use the invisible microwaves weapon (direct energy weapon) to hurt these victims' children then black mail them in opened way (call these victims by telephone.).

The above informations already proved that none place is safety when you live under the EMR mind machine survilliance system. So even the above regular families children who live at home or even stay at hospital, the children still can't avoid to be hurt by the remotely control invisible radiation weapon (or direct energy weapon).

These parents can't do nothing to help their children so a individual even killed one child to protect her from further pain.

This kind situation only prove that the EMR mind machine survilliance system have already established & network whole nation. Also the invisible EMF waves (microwaves) weapon can remotely control the emitters then focus waves to hurt anyone in any where.

(The emitters should be designed as a new electrical parts which combine with old parts as a new parts so it not only has the original parts fuction but also can emit radiation waves by remotely control way.)

The above evidence also show that actions of Mind Machine Operators are extremely evil.

What are the real problems of this Mind machine group to our the society?

Here are some of the basic operational principles of this machine and the problems that existe because of the usage of this machine.

1. Your privacy no longer exist when you are being investigated with the use of the Mind Reading Machine.

This machine use electromagnetic radiation waves to investigate subject, so he who is being investigated will be totally unaware (Electromagnetic radiation is invisible and can penetrate walls, bricks, most metals and almost anything in its way). Next, it sends these collected brain waves to the CPU, and the cpu translates these brain waves into words or picture to describe human thoughts.

Then, these pictures and words are display on a monitor for analysis by the investigators. Because the subject that's being investigated cannot see the electromagnetic radiation, he is totally unawared of the violation of his privacy (of his thoughts read by others). This machine can be used in day or night. It is often used with any stop, so the victim's thoughts are constantly being monitored. Therefore, the dreams, the ideas, the inner secrets or the other private feelings and thoughts of the victim will be will be a open book to these investigators. So, the investigators just have to use the machine near where you live or work, then they steal your most inner secret and take your privacy from you.

The process of reading the thoughts work like this. First, two machine is set up from two different angles. Then, both machines emits a high intensity radiation which crosses the subjects' brains. One machine will emit radiation, and the machine on the opposite side will intercept the radiation wave and interpret the informations. After the detected subject's brain waves had send to the CPU, it will be translated into thoughts with words or picture, finally appears on the monitor which operator can read & understand.

The best way to read thoughts is to make the subject fall asleep and dreams because at those time the person being investigated has very little control what his mind is thinking, and this allow the investigator to influence the subject to dream about matters which the investigators think are important. So the investigator will conduct their investigations mostly at night. But you must remember, they can read your thoughts any time even when you completely awake.

If the investigators are interested in some special information, then they will not just read the thoughts, but they will also actively direct subject to think about the things the investigators are interested. Not only can the EMR mind machine decode brain patterns, it can also send information to the brain using brain patterns. As an example, the investigators might send a picture of something the investigator is interested to the subject's brain, and this will trigger the subject start thinking about the information the investigators are after. This also allow the investigators to study the personality and the history of the subject.

For example, They can fax the nude photo of a girl or man into a person's dream. Then, the operators can study how the person reacts to determine his sexual preference etc.

(In the earlier cited article about the San Diego Hopsital's study, it was mentioned that the research team can determine whether or not a picture is familiar to a test subject with 80% accuracy (A computer is used to analyze the subject's brain patterns, and the computer can determine whether or not the subject is familiar with the picture without the subject having to say anything). This established that a certain brain pattern represents certain "pictures"; and if this brain pattern is send to the human brain, the subject's brain will start to form the "picture" that's associated with that particular brain pattern.

2. Exposure to the radiation emit by this machine is not only harmful to your body, it can also kill you.

Whenever this machine is being operated on high frequency, it can be used to kill you. The beam of high frequency radiation emitted from the machine can be aimed at your head or your body. If the target is your head, your central nervous system will be damaged. If the target is your body, your organs will be damaged. If the target is your heart, it can cause heart diseases and the machine can cause someone to die as if he was killed by natural causes.

Even if the machine is not being operated on extreme high frequency, prolong exposure to the radiation will still make a person ill and slowly cause his death. Also the neurologists involved in this behavior alteration research can promise the microwaves weapon (invisible radiation waves) user how to effectively damage subject's nervous system.

Now let's back to see what will be the reaction of government officers when people report to them such situation.

* The FBI spokesman do acknowledge that they have received large number of requests for asistance from "persons" who believe that they

are being "zapped by radio waves"... (See page 10 on Microwaves Harassment & Mind Control Experimentation.----1992 December)

Unfortunately according to above report, these victims are only treated as "Mental problem persons" then dismiss their cases.

* Now, let's investigate if a person can be zapped by electromagnetic radiation?

If some of the people believe that these victims were zapped by accidental electrical discharge, I would like to point out why this cannot be the cause.

Almost everyone has heard the cliché "lightening never strike the same place twice." This is an observation that is extremely valid. The chance of lightening striking something is pretty low; and the chances of it striking the same place again is considered astronomically small (or nearly zero).

That's because although lightening always strike the topest point of a area, but the topest point will no longer on the topest after it was striken (down) by lightening. Therefore, lightening will never strike any place (a point) twice. (or It should say never strike a same topest point twice.)

The same logic is applicable to these reported cases of being "zapped by radio waves". If this type of "zapping" is caused by nature, then it would not strike the same place (subject) twice (just like lightening). If it does strike some place (or subject) a number of times, then this should be considered as a weapon used intentionally by Man or under human control to cause harm.

I believe that these victims have been "zapped by radio waves" repeatedly. Since if these "zapping" happened only once or twice, the victims would have dismissed it as accidental. Only when these victims are zapped constantly by "radio waves" also cause harming their health, would they request help from authorities or the FBI.

So, these "radio waves" can't be caused by lightening or a naturally occured strong electrical discharge, then it must something that's man-made and designed specially to hurt or torture human beings. Therefore, these man-made devices must be a type of radiation wave weapons.

So far we know that only "Non-Lethal Weapons" can cause the sensation of being electrically zapped. It is the only weapons that we know of which can focused radiation waves to injure the targeted human being.

According to scientist report, these "Non-Lethal Weapons" includes high power Microwaves emitted (non-thermal), electromagnetic pulse generator, infrasound, isotropic radiator, etc.

Currently, we know that only certain departments of the government possess these Non-Lethal weapons in our society. None of the civilians have or use these weapon unless they are involved with intelligence agencies.

Therefore, these users of the "Non-Lethal weapons" all have to be officers of the government (whether they are in uniforms or under-covered).

So, the "smoking guns" is hiding in the pockets of some corrupted officers who have abused their privilege and human rights of American citizens.

These corrupted officials are criminals who have betrayed the trust placed on them by the U.S. citizens. Furthermore, their actions have

violated the U.S. Constitutions, the civil rights, and the very basic human rights of the victims.

Based on the deduction and the evidences presented from the above paragraphs, a frightening picture is emerging. When the victims report that they're being "zapped by radio waves," most of them are treated as "mental problem persons" by Authorities and then dismissed their cases (According to the report of "Microwaves Harassment & Mind Control Experimentation" of ANSA). If we supposed the Authorities really did not possess the "Non-Lethal Weapons," then they might be making only judgemental mistakes. However, the evidence shows that only the officers or authorities indeed possess these "Non-Lethal Weapons." Therefore, authorities' who accuses that these victims are "mentally ill" should be considered as suppressing the truth of the abuse of these weapons.

By suppressing truth about these abuse, it shows that this is a conspiracy against all the people living in the United States. By suppressing the truth, it indicates that they want to continue to abuse these weapons without public awareness. Without public awareness, then there will be no pressure to the legislative body to regulate the use of these weapons. Without these regulations, these corrupted officials may do what they please without the fear of punishment from law, nor can the victims find legal recourse. The continuation of abuse of such weapon will be a threat to every American. Although on the surface, the United States may still appear as the "Land of the Free" and may be more peaceful because the dissidents and critics of these corrupted official have been silenced, but in reality, our country will be moving in the direction of a police state. Also these victims surely are the sacrifices of a political & social conspiracy.

So far we know that the Nonlethal weapon can cause the same symptoms & also use invisible radiation waves.

These Nonlethal weapon include the high power Microwaves emitters, Electromagnetic pulse generators, infrasound, isotropic radiators, etc.

Also so far we know that only some Departments of Government possess the Nonlethal weapon in our society.

So people feel that they're being "zapped by radio waves" constantly or even twice is a alarm to our society because these victims have proved that few offices had abused the Nonlethal weapon to our US citizens constantly in a deep covert operation way. The few officers who abuse the Nonlethal weapons to US citizens are real criminals because they already abuse human rights & against US Constitution.

According to the ANSA's report of "Microwaves Harassment & mind control experimentation"--1992 December, It did prove that some officers (those who abuse Human Rights) have already used these " Nonlethal weapon " on our US citizens for a long time. (ANSA: See explanation at below 3.)

3. This machine can be used to drive people mad:

Whenever the operators of the mind machine had decided to dispose of their subject, one of their tactics is to play with the mind of the subject (their victim). First, they will use the Mind Reading machine to find out about the victim's secret or plan. Then, they will intentionally "bump" into the victim wherever the victim goes. These operators will create the impression that they know all the victim's secrets or plans. Their purpose is to make the victim feels that he has absolutely no privacy at all. This will mislead the victim to believe that everyone know everything about him. Eventually, the constant stress

lead to paranoia and insanity.

If that doesn't work, the operators will "talk" to the victim. This "talk" is done 24 hours a day until it drives the victim crazy or to make the victim to be appeared as to be insane.

Now let me explain how it works!

The human brain is not only responsible for thoughts, but it's also a receiver for electrical impulses from various parts of the body. The brain translates these impulses into actual sound or sensation. For example, the human ears only collect sound waves. Then, one of the organ is the auditory canal translates these sound waves into electrical impulses and send it to the brain. Then, the brain translates these impulses into the sounds that you "hear". So, if you can directly send the electrical signal (characterizing somebody's conversation) straight to the subject's brain. Then the subject will "hear" the conversation without actually hearing it through the ears. The ears is completely bypass in this hearing process.

(This type of technology had been used by the medical community: "They have enable deaf people to talk on the phone again by putting electrodes into the ears of deaf people" & "they've made a blind woman see patterns of light by putting electrodes in the back of her brain"-- In a special report from the mystery of sense of "Discover" magazine June 93).

There is another report about how this technology was developed along with mind control technologies was printed on "Lobster" magazine of United Kingdom in June 1993. It's as below:

Mrs. Janet Morris confirmed John Alexander's involvement in mind control and psychotropic projects in the Los Alamos National Laboratories. Alexander and his team have recently been working with Dr Igor Smirnov, a psychologist from the Moscow Institute of Psychocorrelations. They were invited to the U.S. after Janet Morris' visit to Russia in 1991. There she was shown the technique which was pioneered by the Russian Department of Psycho-Correction at Moscow Medical Academy. The Russians employ a technique to electronically analyze the human mind in order to influence it. They input subliminal command messages, using key words transmitted in "white noise" or music. Using an infrasound very low frequency-type transmission, the acoustic psycho-correction message is transmitted via bone conduction - ear plugs would not restrict the message. To do that would require an entire body protection system. According to the Russians the subliminal messages by-pass the conscious level and are effective almost immediately.

The above device although is developed in Russia proves that the idea of sending voices to someone's mind without him actually "hearing" these voice through his ears can be done. (Those people who stay in a same room with the target person but not at same place couldn't hear the voices too.)

Now let's back to watch what reaction of our Authority will be if our citizens report that they're "hearing voices" in brain.

The FBI spokesman have acknowledged that they have received large numbers of requests for assistance from persons who believe they're being "zapped by radio waves" and/or " are hearing voices"....
(See page 10 on microwaves harassment & mind control experimentation.

However according to the report, these people will only be treated as

"mental problem persons" and their cases dismissed by the FBI.

Now, let's investigate if hearing voices in the brain can be caused by electronics means?

The following is an excerpt from the book of Dr. Robert Becker (who was twice nominated for the Nobel Prize for his work in the field of bio-electromagnetism) published in 1985 (titled: The Body Electric).

In the early 1960s, Frey [Dr. Frey is a scientist who worked on the Project Pandora funded by the U.S. Navy] found that when microwaves of 300 to 3,000 megahertz were pulsed at specific rates, humans (even deaf people) could "hear" them.

In 1973, Dr. Joseph C. Sharp served at the Walter Reed Army Institute of Research. Dr. Sharp, serving as a test subject himself, heard and understood spoken words delivered to him in an echo-free isolation chamber via a pulsed-microwave audiogram (an analog of the word's sound vibrations) beamed into his brain.

Dr. Becker went on to comment that "Such a device has obvious applications in covert operations designed to drive a target crazy with "voices" or deliver undetectable instructions to a programmed assassin."

Therefore, it is a fact that voice message can be delivered to the human brains by electronics mean.

We must educate the public that this is indeed possible and this technology has been incorporated into weapons, so the operators of these "Non-Lethal Weapons" can no longer mislead the American public that these victims are insane and crazy when in reality, these victims are perfectly sane.

Only through this education and general consensus, will create an atmosphere which will allow these victims to come out to make legitimate legal claims against these criminals. Unless this happens, these criminals will forever be above the law and never be held accountable for their evil actions.

The "Mind Reading Machine" use the same principle to imitating the frequency of electrical impulses and actual sound (generated by the ears). Then, this electromagnetic wave is aimed directly at the subject's brain. This will cause the subject to hear what the operators want him to hear without hearing by others. (not sound waves)

The investigators abuses the above scientific principles to drive their victims mad. They will use this second method when the victim doesn't succumb to their first tactic.

They will use the microwave radiation to send the operators' voices to the victim (shooting it directly at the subject's brain).

The subject will hear what they say as normal dialogue in a whisper, but actually it is not a voice of sound waves which can be heard by ears. Since the victim can't find anyone around him speaking to him, he might start to think that he is hearing things. But, as this type of audio harassment continues, the subject will eventually think that he is mad.

If even this doesn't work, the investigators will try to start arguments with the victims by sending him dialogues which will cause

victim to get angry. The victim might be provoked to response to the taunts, insults or profane language. Often, the victim will respond with outburst in public (which is where the operator will try to actively engage in this type of operation). This will mislead the people around the victim to believe the victim is insane (because all they can see or hear is the "unprovoke" outburst of the victim).

This is how the mind reading machine operators try to set up their victims to make the victim to appear as insane to other people. The other might also be misled to think that the victim is arguing with ghost and make the victim to think himself is crazy. At the end, everyone will think the victim is crazy, and the victim will be completely isolated.

To avoid any general public who might meet the same situation & fall into the trap, I would like to use a reply to Dr. Stevenson to clarify the microwaves voices right now.

(attachment)

Dr. Steveson is a Ph D of psychology who is a reader of my post on Internet & has mailed me a question about that how could one differentiate the microwaves voices & schizophrenia?

The reply is as below:

In 1973, the experiment of Dr. Sharp had proven that he heard & understood the spoken words delivered to his brain by using the microwaves frequency.

^^

Since the spoken voices (deliever to the brain through microwaves) is coming from other person, this voices should carry the tone & accent of that particular person who spoke.

So a victim who heard the microwaves voices in his brain (and no one around can hear this voice because it is not sound wave, but deliever through microwaves) should differentiate the voices as that of another person whisper in victim's mind.

If a person can make such differentiation, then the voices should be caused by microwaves.

Thoughts is voice-less language in your mind, and language express the thoughts with voices.

When you're thinking, it is just like you whispered to yourself in your mind with your tone. This is very different than if someone use microwave to deliever words to you.

With this obvious difference, anyone can easily differentiate if the voice is coming from microwave. This also already answer the question.

So if other people use microwaves frequency to deliver the spoken words to a victim, then these voices should carry tones or accents of others which is different with that of the victim.

So victims of such kind device can be educated to analyze the difference, then they won't trust the microwaves voices and fall into the traps again.

However if a person believe the spoken voices belong to his/her own or a good friend, or even misunderstood these kind spoken

voices came from the god (if the spoken words is voices of man) or the angel (if it's the voices of women.) & try to follow the voices, then I will consider this person as a victim who has been driven to schizophrenia.

Sincerely Yours,

Alan Yu

There's one more method which the mind machine operators use to drive their victim mad: When the victim knows that he is being hurt by radiation waves, but he doesn't know who are hurting him.

When these investigators want to dispose the victim, they will hurt the victim by using Nonlethal weapon (high frequency radiation weapon). If the victim doesn't know this and take actions to protect himself, he will slowly die. But, even if he realizes that he is being hurt, the investigators will continue to harm the victim. It will make the victim extremely angry, but often the victim cannot fight back.

This is because these operators will remote control the Radiation weapon & hide into building or house which are around the subject.

The victim will find himself surround by enemies who are "invisible".

It will be difficult for the victim to find where the radiation waves is coming from.

If the victim can't locate it and figure out who are hurting him, his frustration will drive him insane. It will be similar to what newspapers had reported numerous time. "The gun man open fires on the street and takes out his anger on innocent bystanders." This guy will be charged with murder or be committed to mental hospital by authority.

Acutally, this man isn't really crazy. He knows someone is setting him up, but he doesn't have enough knowledge of "Mind Reading Machine." Nor, do they know where to find his "invisible enemies who use the Nonlethal weapon (radiation weapon)". In his final frustration, he will takes out his anger on anyone. This is because he can't find or locate his real enemy (the Mind Machine Operators) to retailate.

The whole story is very simple to those who knows the existence of the "Mind Reading Machine", because the victim was just set up by the operators of mind machine- "TRM".

I would like to discuss two cases which happened in New York city to readetrs right now. These two murderers had been charged as schitzophrenic. However I would like to discuss these two cases & clear the differentiation between schitzophrenic or being efected by the EMR mind machine.

Concerning the events of schizophrenia which occurred in New York, I will further clarify it. There were two case that were discussed in my previous article. One was brought up by Mr. Mark concerning the case of "Son of Sam", the other one was something that I ran across reading the newspaper.

I'll admit that I don't really know the details of the case (son of sam) All I know was what Mark had said that the murderer had killed seven guys. If murderer killed these seven people on different days, and he has no financial dispute, emotional conflicts, and does not have any competitive conflict with his victims, then I agree he should be insane. But if all of

the seven people were killed on almost the same time on the same day without any provocations, then I would suspect the machine might be one of possible causes of this case.

I want to make a clear differentiation between the two possibilities (insanity and being affected by the Mind machine).

If the operators want to ruin their subject, they'll just need to drive him into killing one person. This is enough to make him appear to be insane to put him in jail or send into mental institution (although in reality, the subject may not be truly insane. He may be just releasing the stress that's been created by having the machine used on him). So, logically the operator will not make any more effort to drive the person to kill more on different days. But, the person who is driven mad by the machine may use a powerful weapons such as AK-47 semi-automatic to kill a lot of people at one place to unleash his anger. (This place should be a regular place which the person always go or stay, also where he met a few people who would be the operators and taunting him with their actions to drive him mad.

The person doesn't know this Mind machine but he felt some people know too much about him and everyone seems taunting him. It make him angry at the people of the place.)

The other case happened in spring of 1994 & involves a person who lived in New York: This person & his family was from China.

He killed his wife while she was working. The newspaper reported that the killer have recently heard a voice that he changed his bad luck by killing his wife. The Chinese guy had followed the voice' "advice" to kill his wife when she was working at home because he thought the voices was from the angel & try to help him. The Chinese newspaper--World Journal (This newspaper publish in US.) wrote this event & reported the husband's words as above. I suspect that this case might be caused by something else (such as EMR mind machine operators.) other than schizophrenia.

That's because the mind machine operators can use the EMR mind machine to set up anyone whom they don't like.

If the operators of mind machine don't like this Chinese husband then a female of operators can pretend as a sky angel & deliver the message to the brain of Chinese husband. The message should be just like the news report that to kill your wife in order of change your bad luck. If the deduction is correct then both husband & wife are all victims but the mind machine operators are the real criminals.

Here I would like to show you another information concerned about this subject. It's as below:

=====
 Big Brother's Recipe for "Revolution in Military Affairs"
 In light of recent events, are we currently in the midst of an engineered revolution such as this?
 by Glenn Krawczyk
 PO Box 1540 Burleigh Heads, Qld 4220
 Australia

THE RECIPE

The Association of National Security Alumni is a Maryland based organization composed primarily of former US national security establishment employees who oppose the use of covert operations.
 The Association's letterhead declares their credo:

" actions are counterproductive and damaging to the national interest of the United States. They are inimical to the operations of an effective national intelligence system and corruptive of civil liberties, including the functioning of the judiciary and a free press. Most importantly, they contradict the principles of democracy, national self-determination and international law to which the United States is publicly committed."

In 1992, an Association sub-group known as the Electronic Surveillance Project published a preliminary investigative report, entitled "Microwave Harassment & Mind-Control Experimentation", which detailed the covert deployment and testing of emerging behavior - modifying

directed-energy technologies on US citizens against whom the United States Government has no legitimate legal or moral claim.

The initial study investigated the claims of 12 alleged victims of covert harassment and experimentation. By mid-1993 the Association had been contacted by approximately 72 victims, and at the time of this writing has been approached by over 200 such individuals.

In a 1993 supplement to the original report, written by Julianne McKinney, Director of the Electronic Surveillance Project and author of the initial report, it states:

"While the majority of these 'experimentees' reside in the United States, a number of virtually identical complaints have also been received from England, Canada, and Australia.

It would appear that these activities are also ongoing on the European continent,.....

McKinney later states:

"It has been suggested that the long-term objective of all this experimentation is to develop a system by which all (surviving) citizens of this country may be monitored and tracked by a sophisticated, perhaps satellite-based cybernetics system.

Certainly some of the research being dedicated to 'mapping of the brain' shows this potential.

We are in receipt of preliminary information which points to magnetic resonance imaging as being critical to this process."
(.....)

The above information had proven the Microwaves technology had been used in mind control or as a invisible weapon to hurt or get rid of US citizens who legally live in the society.

4. This machine had built a new slave system, because the subject who be investigated had been treated only as a property of them.

The machine uses invisible electromagnetic waves to invade people's privacy and read people's thoughts without trace of any evidence. The subject is unaware that his thoughts are being read. So, the operators can use this machine on anyone as many times as he please and hurt anyone without any permit. The most horrible thing is that the operators always use this machine depending on his mood. When the operators are in a good mood, the subject may face a fair treatment. But when the operators are in bad mood because he does not complete understand the subject with this machine, the operator will take out his anger on the subject and punish the subject with this machine until the subject is dead.

Watch the words of Mind machine operators-----" If you try to betray us, we'll be informed before you succeed, because we're everywhere, then you will be tortured again."

So terrible threaten words only show readers that the evil action of the EMR mind machine operators. Not only German but already lots countries (such as US, Taiwan,etc.) should use the same mind machine. So the operators of EMR mind machine are really everywhere & that's why they can keep their secret. That's because they not only destroy every subject psychologically or even torture the whole family of subject with their invisible EMF (electromagnetic frequency) weapon or even get rid of them.

I would like to show you the evidences from the report of Microwaves harassment & Mind control experimentation (Electronic surveillance Project) --December 1992

The victim will be isolated from their members of his/her family when highly focused forms of electronic harassment commence.

The exception to this is when elderly parents and young children in the family became targets for apparent purposes of intimidation.

There is two cases which had been reported on above.

One individual (driven to extremes of stress by ongoing electronic harassment focusing on her children.) killed one child in an effort to protect her from further pain.

One individual during a telephone conversation, was told by an employee of a local power company, that if she value the lives of her children, she would better drop her opposition to the installation of power line.

The above cases indeed prove this group is challenging the current law, & Constitution.

6. Who are investigated by the "Mind Reading Machine operators".

Based on how this machine has been used in Taiwan. I should say that they try investigate everyone in their country. They do not have enough agents, however, to do this. Therefore, they focus their attention on investigating the key person in politics, business, science, organized crime, etc. These people are mayor, the congressmen, highly ranked scientists, businessmen, the crime bosses or anyone whom they are interested in. The actions of these operators are beyond all logical thinking. They not only investigate criminal, but also normal people whom are important or they are interested in. The operators will keep their records on the subject forever. They will continue their investigation of same person until the subject is under their handle (The mean they can predict the subject's action.).

These people should be totally unaware of that they are being read thoughts or spied & the operators can predict their actions.

If some important people are against the interests of the mind machine group, then the operators will use the machine to read and influence the minds of these people (also a kind of unawared victims) to eliminate opposition. If any important people cannot be controlled by the mind machine group, "Non-lethal" weapons will be used to induce death.

The mind machine group won't torture the high position people but only induce the artificial death to them (who oppose their interests & can't be controlled.), if there's no opportunity the mind machine group will make the chance. (if not then the mind machine group will keep waiting or find the next chance.). That's because these people's complaints will cause large attention from the society if they are tortured.

In general public, he who knows, will be torture and tracked forever until death. Those who remained ignorant is allow to live peacefully because they can be spied on at any time and then, they will be under controlled. However this kind peace living will only last as long as they are not aware of this mind machine & no intention to oppose the interests of mind machine group.

And that's what the under control meaning of mine.

They think it's the best way to protect the country. So if it's the same situation in United States. Who are investigated by them? I believe "most of us are investigated by them at least once." If we don't make a new law to regulate this groups and machine right now. The situation will only get worse. The unauthorized power of the investigators will extent to maxima. And it will be even more difficult to be changed in the future.

Especially now the information or report have proven that the local law enforcement already use such kind equipment. (Time Magazine reported such as Russian mind machine & nonlethal weapon have been used by local law enforcement of US.) It prove what I say are purely true.

I suspect that they might already build a general public surveillance system of entire nation in these countries.

I would like to show you a information as below:

In August 1971, there is a general efficiency surveillance security system program proposal submitted to the President Nixon. It proposed to wire every house, car, and boat in America. The plan included a blueprint for a government- operated propaganda system via a TV network that would have linked every state, city, and home.

(See page 181 on the "Uncloaking the CIA")

Although this program wasn't accepted At that time. It did prove that they have this plan and can make it for a long time. If once they carry out this plan in right now, they can combine with current scientific technique such as "remote viewing", non-lethal weapon, mind machine-"TRM". They can easily to make it also advance to the invisible (electromagnetic waves) way.

In 1980, the Senate passed the Intelligence Oversight Act of 1980. This Bill include establishing no standars for covert operations or employment of academics, clergymen or journalists as spies or informers and npopewnalty for the public disclosure of agents working for the US.

(See page 73 on "CIA"-by Brian Freemantle)

The above Bill already prove that they were allowed to build the general surveillance system if they could operate it in covert way.

Then this machine might have been installed in all public buildings, such as shopping centers, schools, supermarkets, bank, airports, etc, also include the vehicles. (The main intersection of street, the shoulder of highway might have installed the electrical receiver.) The law abiding citizens will be totally under their control wherever he/she goes. That's why they so serious to deal with any security leak.

Some of them also already abuse their Mind machine surillian system & invisible EMF waves weapon to pursuit personal interest or unlesh personal anger. The above cases of children being hurt by the invisible waves weapon are the perfect examples of Mind Machine Operators abuse of power.

Since the Mind machine- "TRM" have been invented and kept as a top secret ,certain part of authorities have changed their position to protect the mind machine-"TRM" secret and the operators first. If

people mention about this machine or be aware of this machine, they will be accused as insane or gotten rid of by the operators in spite of their human rights.

If the authority deny this device also allow the machine operators using the invisible Nonlethal weapon to get rid of people, then I'll ask you a question. Do you believe some of the authorities is still abiding the founding principles--FOR THE PEOPLE, BY THE PEOPLE, and OF THE PEOPLE?!

7. The machine can be used as a tool of surveillance and interrogation to any subject in any place, if the operators so desire.

How could they do it in the whole country?

There are three reasons to explain it.

The first reason: The machine combine with a special surveillance system--" remote watching" (or later might combine to use the injectable micro-chips to track people.). There are some radar which can find a fly a kilometer away or track a human at twenty five miles.(see the report of Dr. Becker on above) Also there is a " PSI TECH" company hold a " remote viewing" technique, they can used this to find the Saddam's scud missile site and the napped person in the hidden place.(see report of Ms.Armen Victorian.) I suspect the both report concerning a same equipment but the "remote viewing" is the advanced & final product. The "remote watching" use such kind of radical waves(with the penetrate ability of walls, brick, metal) to find and locate the subject (or object) accurately in any place (home or building) no matter day or night.

This EMR mind machine (TRM) also can connect with the surveillance videos in the public building. If the really carry out the program of general surveillance system, the machine suppose to be installed with remote watching on the outside of building-top or light poles to watch the people in the outside space area. Also it can be remotely emitted the microwave to hurt any subject.

Now let me show you such kind information which is " Project Slammer. Project Slammer is a CIA-fund study, managed by CIA & FBI behavioral scientists, which explores the "mental make-up" of alleged security risk, along with their family members & close associate.

Ms. Julianne Mekinney, a former intelligency agent of US Army, point out that a survillian activities might fall under purview of "Project Slammer". The response of spokesman of FBI was angrily declaim that " You don't know who is conducting that survillian system! You don't know if that is a state police surveillance!...or a local police surveillance! It could be a totally unleated operation! You don't know who is conducting that surveillance! ..[etc.,etc.]

[See page 10 on --Microwaves Harassment & Mind control experimentation (Electronic surveillance project) December 1992]

However the answer of spokesman proved that the FBI is at least acknowledging existence of the surveillance. Also it proved they all can use this surveillance system from local police , state police untill FBI, CIA.

The second reason: There are lot invisible weapons have been invented and can be combined with the (TRM) machine to use (such as the microwave emitter, electromagnetic generator, the infrasound weapon) to interrogate or threat anyone, or interfere with any victim brain's electrical activity. This kind action won't earn any other to pay attention to it because these kind weapons are invisible, noise-less (except

the painful holding of the victims.), and no external injuries evidence.

So these EMR mind machine operators always pride that they can torture people & never can be held by law.

There are eight cases of microwaves harassment happened in families which have been reported on above. (See page 9. microwaves harassment & mind control control experimentation.)

The third reason: The (TRM) mind machine can be remotely controlled & installed in the vehicle just like the mobile-phone. So wherever you go (by car) or wherever you stay (any place), you're totally under spied, if they so desire.

So if any top Authority had taken the bad decision --" install this machine in all building & vehicle also install the electrical waves receiver in the intersection of streets (or highway shoulder) such as light poles. Then what will happen? Only the law abiding citizens will be totally under spied without any privacy, no matter of where you go or where you stay?

Now let's figure out that --Does our society have been built these kind electric surveillance system in entire nation?

I would like to show you this kind information to you. It's reported on the article of "remote mind control technology". (Author-Anna Keeler)

(attachment)

In 1984, U.S. House of Representatives

report, a large number of stores throughout the country use high frequency transmitted words (above the range of human hearing) to discourage shoplifting. Stealing is reported to be reduced by as much as 80% in some cases.

The above situation seems this microwaves frequency of delivering message (device) had been used in these stores. What is frightening is that words, transmitted via low density microwaves or radio frequencies, or by other covert methods, might be used to create other influence.

(.....)

it is now known that applied biological (and other) frequencies can also be used as direct "information inputs" (e.g., of feeling or emotion) and to reinforce brain rhythms associated with conditioning and information processing. One way to get such a signal into a human may be through use of a high frequency carrier frequency. Results of research into information processing, unconscious processes, decision making, memory processes, and evoked brain potentials would likely be exploited or integrated in an interdisciplinary system.

Covert technological influence is not so foreign to the American way of life as one may think.

** The above report in a 1984 U.S. House of Representatives, mentioned that high frequency audio transmissions are applied, for instance, in some department stores to prevent theft (one East Coast department store chain was reported to have saved \$600,000 over a nine-month period), and in some grocery stores with the result that employee induced cash shortages significantly decreased and employees are better mannered.

In other words, as Helms wrote of, verbal messages are delivered at frequencies above human hearing. Technology for commercial applications is relatively sophisticated (one studio uses a "layered" approach and 31 channels in preparing tapes; some employ a "dual coding" approach, integrating scientific knowledge of information processing modes of the two brain hemispheres, and others use techniques where a consumer is spoken to as a three year old child). There is no U.S. law specifically regulating these types of transmission (over radio and TV a Federal Communication Commission "catch all" provision might apply).

If industry uses undetectable audio transmissions to meet security concerns, it seems that the military and CIA would exploit the same technology and would have developed much more sophisticated technology for applications. The public's conception of "subliminal" [programming] is naive compared to capabilities.

According to above information, I would like to deduce that these bussiness stores' owners might have cooperated with the Authorities or Intelligence agencies in a covert manner.

So these stotres owner can spy any special subject (empolyee) for authorities (or even help to drive a subject mad.) with such device.

On the other hand, these bussiness owners also can get benifet from such device, such as to protect their property or easily manage their employees.

Such kind cooperation can reduce the against opinions from society to such device. It also can help authority to build the electric survilliance system in these bussiness stores then network entire nation.

I would like to show you another evidence from the report of "Elecronic surveillance Project"--- by Julianne Mckinney.

The majority of those now in contact with the project -white-collar professional --have lost their job. Termination of employment in many of these cases involved prefatory harassment by the employer & co-workers, which considered with other overt forms of harassment.

The above information prove that some business owners might have recruited by this mind machine group to co-operate this machine & radiation weapon to US civilians.

If our society already be made the sacrifice for the "TRM" and the crimes have never been reduced, Who should responsible for it?!

8. This machine have done a lot of harm to our society but still can't reduce crime.

I don't intent to oppose the CIA nor to any other agencies when I talk about the Mind machine-"TRM". I just want to let this machine to be used in right way. Authorities always think that by keeping the machine as a secret, they can easily stop crime or find the spy. Comparing with the facts, we know it is wrong. The problem here is such kind machine is usually used on law abiding citizens first, but not very effective to regulate the criminal. this is because the law abiding citizens have fixed job, fixed address, regular life

style and all have I.D. The operators of machine can easy find them, check them, or work on them, they are totally under control of operators of the machine.

On the other hand, the criminals almost have no fixed job, no fixed address, no regular living style, come and run suddenly, or even no I.D. except the leaders of mob (they have the fixed address.). The operators of the machine can't so easily find or get them and keep working on.

That's why the operators can't predict the actions of the criminal and the crime have never been reduced. Also the spy will be more difficult to find than the criminal because the spy of other country will be taught how to counter "TRM". Furthermore, some people who are absorbed by intelligence agency of other country, could also be agents of United States because other countries would try to absorb people who have access to classified documents or military secrets.

Therefore, these double-agents will definitely know the "TRM" very well and know how to avoid being detected.

So the "TRM" will be mostly used on the law abiding citizens. If the authorities continue to keep the mind machine- "TRM" as top secret then it only hurt the law abiding citizens and keep special privilege of operators forever.

The operators not only can use the machine do their regular job but also can use it for their personal motive without any limit.

On the other hand, if the whole nation surveillance system already built and the operators just need staying the central machine control station and can watch everyone or hurt everyone by using the non-lethal weapon. Then what will happen"?

Everyone will be under the threat of their power. If any operator make any mistake who can stop or correct the event. If one of the operators try to get rid of any important political people who can stop him/her? If the whole nation surveillance system is true, they even can get rid of our President of country. Who can check their loyalty & who'll read their thoughts for the country security? Especially, a retired top political people will lost all power and also under the threat of mind machine with the surveillance system.

I hope the authorities can release the secret of mind machine. Let this machine be used under legal restriction and force the operators work in opened way. Let the operators work as the public servants who have the delegated power but also have the obligation. Once the operators of machine can work in opened way, it will not necessary to get rid of anyone to avoid security leak. After the duty of operators have been opened to society, their actions can be also checked by representatives from the city to state then to federal government.

They can't do everything as before, then the cruel action won't be easily committed. On the other hand, this kind technology should also be transferred to the civilian scientists or academia for using in medication or other variety ways which are good for mankind. That should be the original goal of the inventors.

9. It can make the car accident on high way to get rid of people.

I would like to explain it to you as follow:

This machine can be installed (mighty have been installed) into your automobile because it can be remote controlled.

Now, I would like to explain to you that how it can works.

Two small specially designed emitter emit the magnetic waves which

frequency imitate the brain waves , is the basic requirement.

Another one is a special radar which is used as remote watching emitting waves to locate the subject accurately in the car.

After the designed emitter and radar are installed in the car, it emit the magnetic waves when you're driving. That's because the emitter are connected with the emission or engine system. The receivers of the brain waves can be installed at the intersection of street to receive the brain waves from the car (Such as the light pole which locate each main intersection of streets, roads or the shoulder on high way. If they have installed this kind system in light poles then they should have succeeded to handle people in cars .)

This will just like the mobile-phone which you can talk in the car within a large area but this machine use the different also special low frequency radio channel. Also each pair emitter in a car should have included different code- it just like the different phone number of every mobile-phone in the car.--to distinguish the signal(brain waves) come from different car.

This way, the investigators of control station can monitor what you are thinking when you are driving. They also can remote the small emitter emit high frequency radiation to interfere with your thinking process and make you feel sleepy, or even aim the magnetic waves to the brain on the part of nerve system which control sleeping to make you dizzy.

This will make you suddenly falling into sleep without any knowing while you are driving on highway to cause the car accident. They will do this to get rid of the subject whom they can't control or they don't like , or whom is the victim for the purpose to avoid the security leak.

Now I would like to show you some information which is as below:

Mr. Lundis, a very religion gentleman who work at the church every Sunday as a volunteer, told me that Since 1983 the automobile of US had been designed to emit signals from the car to satellite. He told me that the authority can monitor you wherever you go (on the car). (According to the ability of injectable microchip which can track animals, cars, or even human. See above explanation.)

I believe what he said was a fact which based on his best knowledge.

If what he said was a fact then this proved that the general surveillance system indeed has existed for a long time. Further more this also prove it's possible that a mind machine might have installed in every car of the nation. That's because they can collect information of your thoughts (brain waves) & use this signals to send to satellite.

That's why they designed the emitters in the car to send signals to satellite. Their purpose should not be only to find where you are because it's too simple & nonsense. The real purpose of them should be to read your thoughts to know what you think whenever you go.

I'll deduce that the radiation waves emitter might be installed in the front between driver seat & engine. The assisting collectors of brain waves can be installed on the side of road or intersection to increase the collected ability of signals.

If above situation happen to any owner of cars, then I'll feel sorry to him/her because there's no any privacy in his/her car. (The above injectable micro-chips also can be installed in each car & tracked by satellite.)

If the electromagnetic waves emitter is indeed installed in the car,

then the location in the axis of steering wheel should be the most possible area which can be installed the radiation waves emitter.

That's because it face to your face & can easily emit the EMR waves on you also this place seldom happen the problem.

However I have found a heavy & thick hexagular metal in the axis which is connected with a "electric magnet"(it's made with a iron bar). The thick & rounded "electric magnet" isn't a necessary equipment which is connected with the horn. That's because they can easily use a wire instead of the electric magnet. (They use the electric magnet as a part of circuit of the horn when they can easily use a wire instead of magnet.) Also the heavy & thick hexangular shape metal is completely useless in there except to connect with the electric magnet to increase the electromagnetic field. (The electric magnet is fixed with the special design, hidden in the axis of steering wheel, then connect with the hexangular heavy metal.)

I already took away this hexangular metal and insert nonconducting material to avoid anything might conduct with the electric magnet. That's because I couldn't move away the electric magnet which is fixed by special design to avoid that anyone who might doubt it & move it away.

The hexangular metal is about 2 lbs & look like as below:

There's something look like (black) rubbers but can be used to completely circuit which you can find it at the video game controller. These kind thing (look as rubber) hold this hexangular metal on six points also connect with a piece of triangular shape metal (hold at same six points) on button.

The piece of triangular metal look like as below:

This piece metal is used to hold the hexangular metal at a fixed position & then connect both (The hexangular metal & the electric magnet).

After I put into the nonconducting material to cover the electric magnet then I cover with few pieces of other metals. I hope I can block any waves which the electric magnet might emit out. (After that I never meet the unnormally dizzy situation in a hundred miles driving distance. Before I found this I have ever met few times dizzy situation. Also once I was only driving in a short distances.)

Some people might say that this magnet is a sensor to determine the position of wheel. I disagree with it.

I had learned how to maintain a car to keep it working in best condition in my military service.

That's because I learn to drive in military. The military taught me how to maintain a car before I learn to drive it. There's words of them-

"learn to maintain before you learn to drive it." Also I do have the certification of car maintenance technique of Taiwan. I got that because I pass the examination before I came to US.

So even I'm not major in mechanical engineer but I do know much about a car.

Not only I can do the routine maintenance job for my car but also can do the engine tune up or cooling system flush. This kind maintenance knowledge of mine make me know that which parts should have sensibility.

Also this words only shows that they didn't check this parts. That's because the rounded bar magnet is fixed with steering wheel also has a small hole to connect with another piece of triangular metal.

The above is already enough if they really need this magnet as a sensor (which I don't believe because they can only use the piece of triangular metal to determine the position of wheel.)

So it's obviously. if you can only use the piece of triangular metal to determine the position of wheel then they won't need the hexangular metal.

What is the function of the hexangular metal? I don't think that any kind reason need the thick & heavy metal which weight is about 2 lb.

Also the piece of triangular metal connected with the black materials in six point of the hexangular metal then contact with the electric magnet.

The black materials (look as rubber) can be used to completely circuit which you can find in the controller of video game.

This can increase the electric field & face to the driver's face.

I have said that in my previous reply if the few suspects have installed the emitters of mind machine in cars then they would design the new parts. This kind new parts should combine with the original parts. So this parts not only can work as original parts but also can emit the electromagnetic waves.

It's obviously that the above electric magnet & the hexangular metal can also emit electromagnetic waves. That's the main point.

Even the electric magnet is really used to... as they said. From the view point of function, you can either say that the function of parts is used to produce the electromagnetic waves or might...as they said.

However I can drive my car as normal after I took away the thick & heavy hexangular metal. We know that manufactures always advance their technique & reduce the unnecessary parts in a product to reduce the cost.

So this kind situation is very unusual if any part is useless but include in a product.

Everyone can check your car in the axis of steering wheel to find it.

One more evidence is in the steel frames which divide the driver's door & the passenger's door. I describe it as below:

There's a wire connect with the back door to supply the electrical power to door light. This wire extent from the steel frame between two doors (The driver's door and passenger's door are separated by the steel frame.)

This steel frame is used to hold the seat belt also there's space inside to install wires. I found the wires which supply the electric power to the door light, are split four wires.

The very stranger thing is that one of the wires connect to some thing inside the steel frame which was covered in the steel frame like a box. So you can't see it. However this wire supply the electric power to something of the box. I already disconnect this wire & still drive as normal.

Both side of the steel frames which divide the driver & passenger doors, have the same thing. One of this frame locate the side near of driver. If they installed the collector of brain waves & emitters inside this frame (near brain of driver) then they not only can read driver's thoughts but also can deliver spoken words to driver's brain to drive him mad, or focus EM waves on the part of driver's brain which can react dizzy situation to cause car accident.

The diagram as below:

A wire connect with the thing as plug (The ! as a plug locate in diagram & the wire ^ connect the plug as a outlet.)
 I have already disconnect the wire with the steel frames of both side.
 Now I can drive as normal without any botching.

The third evidence is as below:

There's a wire carry electric power whether is negative or positive charge. This wire has a rounded hook to connect a screw then contact with the body of car. This wire is hidden in the body side of car near the driver feet.

This wire is covered with plastic & rug which use glue to fix & avoid to be removed.

Both side near the front door, have the same wire to contact the the body of car.

Car diagram:

Even I took away these wires found that the body of car is still carrying one of Charge (electric).

So it should have other wire which carry on charge then connect with the body of the car.

These wires connect with car body & always carry one of charge of electric power (in negative or positive charge) because it came from the battery.

So it promise that any other wire contact (or remotely controlled to contact) with the car which is carrying the other charge (negative or positive charge) then can supply the electric power as normal.

The wire in the steel frame will be used exactly as what I said. If they did install the emitters of mind machine in cars then the situation will like below.

The axis will emit the electromagnetic waves & the frame unknown box can collect brain waves or deliver words.

If they try to make a car accident then the magnet in axis can emit large electromagnetic waves to cause driver falling in dizzy situation.

After I block the electric power on above wires, so far nothing bother me & I can drive as normal.

Some people will think that this isn't the first time that you've attributed normal human failings to machinations of this device. Can't I accept that there is no such device and that people fall asleep at the wheel either because they're tired or have fallen prey to the hypnotic rhythm of the road and boredom?

Well, I have heard about this kind theory since I came to US. However I never heard this kind idea in Taiwan and never have this kind feeling when I was military officer & driving on high way in Taiwan.

If the high way is exact straight & can last such kind straight line at least over three hours then I can consider it might be possible as they said. Chance are this kind situation seldom happen.

People fall in sleep by reduce their concentration but not pay concentration then fall in sleep. Although it can easily causes tire after drivers get off their cars. However in normal condition, the human reflex in body can produce alert signal then human will know how to avoid danger.

So If people drive on high way & feel tire, this kind situation should come slowly & can be known by driver as a alert signal. The driver should have enough time to consider that whether take a rest or not. The emitters of mind machine will cause different situation. The large EM waves will suddenly cause people to become dizzy to the point of unconscious. So driver will cause car accident without the alert as normal reaction from natural reflex if driver doesn't have the knowledge of the mind machine. That's because there's only a few minutes time to make right decision to avoid the car accident before to the point of unconscious.

However the above straight line seldom happen in high way except in dessert or may be few areas which I don't know. So I don't take it as a usually happened condition.

If people have a good sleep and in a normal physical condition then I would like to make a logical consideration. It's as below.

In my own opinion, when people are driving & watching the road, their blood will flow into the brain for their concentration logically. In this condition it'll just like the people play the gambling in a room.

People seldom fall into sleep in a gambling. So it should seldom happen fall into sleep when they're driving. Especially if they suddenly feel dizzy in one or two hours driving time then It's really unusual.

However this can easily cause tire after a long distance travel when people get off the car.

That's because people spend lots concentration (brain energy) in driving.

On the other hand if people didn't have good sleep or not in normal condition in one's body then it doesn't count.

Now I would like to show you a example & this staged accident might be caused by the electromagnetic waves (microwaves) which emitter might have been installed in cars & was remotely controlled by EMR mind machine group.

It should be noted that, In some cases "accidental" death do occur. One individual in contact with us reported that his mother drove off a cliff to her death, during a period when he was researching evidence that a still-respected, high-level state Department official had passed A-bomb secret to the Soviet Government during World War II. The accident occurred shortly after her car had undergone routine maintenance. She was returning from a dental appointment when the accident occurred.

Witnesses states that it appeared that she had suddenly stepped on the accelerator before running off the road. The accident served to terminate this person's research project.

[See page 8 on Microwaves Harassment & Mind control experimentation (Electronic surveillance Project) ----December 1992]

Considering the millions people who are driving & affected by the emitters of mind machine if the emitters really have been installed in cars.

That's why I must tell the society with few example which facts had happened before.

If you disagree with the deduction based on Mr. Lundis' words & above evidence, then I would like to ask you a few questions ?

Can you explain the two evidences which I found in car.
what is the purpose they installed the hexangular heavy metal in the axis of steering wheel?

Why it need to connect with a electrical magnet? Also both metal are not necessary in using except these kind parts can increase the electric field. I already took away the hexangular metal & still drive as normal. Also after that I never meet the dizzy situation in a hundred miles distance while I'm driving. (Before I found & took away this hexangular metal, I meet such kind dizzy situation few times even in a short driving distance.)

Why they need to connect a carrying electric power wire with the front body of car from both side?

Why they need to connect a wire with both side steel frame? (which wires always carry electric power as the horn.)

(The steel frames divide the driver's door & passenger's door)

It not use for any light but supply the electric power to something which is hidden in the steel frames as a steel box.

Every one can check these place to find it, it won't spent you too much time.

The belief & concentration are what you only need.

Why they want to use the carrying electric wire to connect the Unknown boxes?

What kind things will be hidden inside the unknown boxes?

Do you have a logical explanation to it?

The answer might be only that the emitters of EMR mind machine have been installed in cars then can solve these question.

If the above deduction is true then even most people didn't get hurt, It's still a terrible thing.

If you disagree this point then let me explain it as a example:

If people live in a country which is carrying out the martial law, they may see the soldiers carry guns at the intersections, or the

machine-guns locate on important locations. What will you think about it? You'll think these people are living in a freedom society or dangerous situation!, even most people never get hurt.

If the emitters of mind machine have been installed in cars then what will happen? It's obviously that we can figure out it as below:

These kind cars are similar as the country which are carrying out the martial law and then drivers are similar as the people.

The emitters are analogous as the guns or machine-guns in people's cars and operators of mind machine are similar as the soldiers who hide in the central machine stations.

The operators of mind machine not only can read drivers' thoughts.

The operators can shoot (focus) the electromagnetic waves as a weapon on people's heart to cause natural death, or emit large electromagnetic waves to make driver falling in dizzy condition suddenly then cause car accident on high way.

They also can focus the waves on driver's brain on the part which can cause dizzy to cause car accident too by remotely controlled way.

The operators can get rid of drivers as above even they never hurt you, if they had installed the emitters in cars.

If the above deduction is all correct then your car not exactly belong to yourself. Whenever you're driving the machine automatically detect your thoughts but the chance is that the machine operators will read your thoughts or not.

The operators of Mind machine just need to turn on the switch of your car in the central machine station. They can read your thoughts wherever you're driving. It just like they reach you on your mobile phone. The only different is that they not only know what you say but also can know what you think!

The most terrible thing is that the machine operator might emit the huge electromagnetic waves to force driver lethargy (fall in sleep suddenly) and make the car accident to get rid of anyone on high way, if they so desire.

About Mr. Lundis words, Mr. John Ho of Dallas, Tex. made his comment with a true story as below:

Regarding the people are being monitored in their daily life, I do believe that there are a lot more going on than we think. Let me share with you a true story:

Recently a big telecommunication company here in Dallas was testing their new PCS (Personal Communication System) in downtown Los Angeles, it required to install some small receivers on the light poles. While the technicians were installing their equipments, they found some unknown boxes hanging on the light poles and none knew what it was - these are veterans technicians who install equipments all over the country. Apparently one of the guys must have done something to one of the boxes b/c a few days later, the office in Dallas received a phone call telling them to stay away from those boxes. The caller is the FBI.

Question here: what's in those boxes? why is FBI involved?

What are those boxes doing there? what does it do?

What is this thing? go figure.

// John Ho from Dallas, Texas, USA (john@jho.com)

I do believe that information of Mr. John Ho is very valuable and have proved something for me.

I knew a victim of EMR (electromagnetic radiation waves) Mind machine. The experiences of this victim was that when he walked to local supermarket shopping, sometime he heard the spoken words to deliver to him in air. Also he feel that sometime the waves was shot on his head while he walked pass by the light pole.

He told me this situations few times and I always tell him this only came from mind machine so don't confuse it even we can't find the exact location of the machine to be installed. Also I always think about that how could they find a subject exact location while he walked. I had ever doubted the light pole but I can't make the judgment since we have never a chance to check it. Also may we have no this kind knowledge to judge whether the equipment of light pole is normal or not?

Fortunately, some technicians had checked it for us and this indeed prove that we have found the right way. The surveillance system is indeed exist but they change to use the wireless way (EMR waves way) instead of the old plan to wire every home.

If this kind boxes indeed belong to FBI then I would like to deduce that the light pole is the exact place which was installed the surveillance system.

This modern surveillance system should include that:

1. remote watching (remote viewing)--use the EMR waves to spy everyone who pass by the area & find the exact location of any walking subject whom they're interesting in.
2. electromagnetic waves emitter--to shoot & hurt everyone whom pass by if they want or deliver the spoken words to everyone who walk on the area if they try to drive anyone mad, and send signals to remote control the equipment in driving car.
3. EMR signals assisted collector--to assist collection the brain waves (thoughts) from any car which pass by so that they can read anyone thoughts while he/she is driving, if they so desire.

Also the surveillance system on light poles can network to whole nation by the electro radiation waves connected way.

If the above deduction is correct, I would like to say that.

The things is obvious a part of surveillance system.

So they can do above all of the things. Chance are that the agents are not enough to detect everyone of entire nation. So will you be detected or not? it will depend on the choice of the agents (machine operators) to turn on the switch of your car or even home (in the mind machine central station) or not.

Some people will say that the manufactures won't sit back quietly to this and there's no way you can install such device without knowing from machinisians in routine maintenance. Also a mechanic who's looking for problems might stumble across a couple of dozen of these every year.

No! I really don't think so even the manufacturers under their pressures.

Surely some people who worked in this area disagree with them and released this secret information to society.

That's why We could hear & share the information (from manufacturers) here Otherwise we won't know it.

Also I disagree that this kind action belong to our government.

Anyone who has this idea then already get lost in this subject because he/she misunderstood the meaning "Government".

Who is Government & who stand for the country?

Our US government divided into three parts- the Executive branch, the Legislative branch, and the Judicial branch. The Mr. President is the head of executive branch and can stand for the Government.

The Constitution, the whole Congress, and the majority of the people stand for the country.

If anyone American people won't care who he is, violate constitution he is guilty.

That's why former president Nixon left the position of president in the Watergate event.

No any title above the president in executive branch, so no any officer or agent can violate the constitution too. Otherwise these people are criminal suspects but not officers especially not government.

The agents who violate constitution is only a few people in the executive branch or even in any agency.

They even can't stand for the normal officer so no any chance stand for the "Government" especially if they violate the Constitution.

They're guilty if their action indeed violate the US law or Constitution.

Except they're represent the executive branch to carry out their duty in legal way & no any action violate constitution. Then you can say that they represent the government.

If what I deduce the emitters of mind machine in cars is correct, then these people are guilty because the violate constitution.

Also I only talked about the operators of mind machine & the emitters So I never think this kind actions belong to US government but few agents who violate the constitution in a covert manner also without authority from the government.

So don't accuse the Government of US. Most of officers in executive branch might even don't know it.

From the Rodney King event in California, we know that few authorities might violate law even when they were carry out their duty. After they violated law they're suspects but not officers.

The whole nation all angry with that event after the TV broadcast this news.

The former President bush, the General Attorney all resent & disagree this kind action can stand for policeman. They're not chance stand for the Government.

The machine operators are in the same condition.

They're guilty. They're not officers but suspects if they really use the emitters to hurt or get rid of people.

I still believe that our country have the best Constitution in the world. Also the best Constitution need to protect by actions from the government to our all people, otherwise it's only words if some people don't care about it.

However if some people or even few authorities violate the US Constitution in a covert manner then they're not "officers" but the "criminal suspects".

This kind few authorities can't even stand for their own agency because I believe our real agencies will follow the law & constitution of US.

We should fight with them to protect our country & Constitution.

This kind actions not only protect our rights but also maintain our country stand on the world forever as a symbol of FREEDOM, LIBERTY, and JUSTICE.

I just reported the words of Mr. Lundis & believe what he said based on his best knowledge.

If what he say is a fact then I would like to make a logical consideration as below.

Actually the manufacturers are real victims in this whole event.

Few authorities might seduce & cheat manufacturers that the purpose of this thing is to protect our country. Also the authority would say that they just want to find the spy or criminals but nothing else. The manufacturers would not know that the authority installed in the equipment's of mind machine. In stead of that the manufacturers would consider that they only help to install a tracking device.

It won't get hurt if they only installed the tracking devices. This kind action can help authority to track the spy or criminals but won't hurt the law abiding citizens. So in this condition, if the manufacturers agree it then they would think that they're patriots but not conspirators.

However it's still violate the Constitution so some of them release the secret out. Also if the authority promise the manufacturers that this kind devices would install in all cars which are allowed to sell on the US markets from the agreement of Government which was made in their misled way. (If they really have installed in the emitters of mind machine in cars then the top officers of Government are also victims. That's because they're misled by these few manipulators (few agents). That's because the top officers won't know they installed the equipment of mind machine which can focus the strong waves to shoot on human heart to cause natural death, or emit the large EM waves to make driver feeling dizzy suddenly then cause car accident.

The top officers might be only told that they only install the tracking device but not mind machine equipments, even if they told it's mind machine equipment but would say it only can read thoughts. However they would never tell top officers these emitters can focus waves to kill human being in a car or cause car accident from their remotely controlled way.

The manufacturers were misled too. In such condition, manufacturers would think that even from the view point of the competition, all cars still meet the same competition & the equal situation.

That's because there's no any manufacturer will be allowed to be an exception. Under this kind "forces" or pressure, the manufacturers might have no chance to select but only can follow the plan. Also few of them might participate this plan in a aggressive manner in order to protect our country which as the authorities told them.

However I can sure that none of manufacturers know that the mind machine might have installed in the cars and never know these emitters can kill human being in cars as natural death or cause car accident. So the manufacturers are victims in the whole event if the authority have installed the emitters of mind machine in cars. The above is only a logical consideration & deduction, if the words of Mr. Lundis is a fact & they have installed this devices in cars.

I believe our American people would like to fight for the justice, for the freedom of their thoughts, their privacy rights, and the Constitution of United States. I believe our American people would like to fight for the human rights but not to be the humble slaves of the Mind machine operators.

However people won't be angry to any terrible thing which people aren't aware of it. That's why I talk about this mind machine to our society. That's because it's hardly aware of this machine if you don't have the knowledge about it. Actually even the machine operators are hurting people, people might only think that something happen them from their bad

luck because they don't believe the operators of mind machine can do this.

If the above deduction is true then the agents might have installed in the emitters of mind machine in cars without permission from the government.

That's because the Congress or even executive authority won't allow these agents do this if they know this emitters can get rid of any human being.

These few agents might think that this kind action can easily accomplish their mission also people won't be aware of it. So they dare across the line and install the emitters of mind machine in cars.

The real problem here is how could they install this kind equipment(device) also avoid it to be found by machnicians in any repair store.

However if the intelligence install it then it won't happen the problem as above. That's because they should have considered about this & solved it.

Under a logical consideration, I would like to explain it as below:

If this kind emitters have been installed in cars then this emitters will be specially designed & combined with the regular parts as one to use.

For example, If they designed a special emitter which can work as the original regular parts but also can emit the electromagnetic waves.

If they install this kind emitters in hidden place such as the place behind the speed-meter as a motor to work for speed needle then who'll know it. (Also they might install this emitter in the axis of steering wheel to connect with horn as the normal parts.)

This area will not be checked in any routine maintenance. Also this kind area seldom happen problem to insure that this equipment won't be found by other technicians.

I can say that not only the routine maintenance won't touch it (it's no necessary to open the plastic cover about the speed-meter in any routine maintenance.) but also this area won't meet any problem at all.

That's because the performance of the emitters' parts should be designed & tested above the standard of all other parts.

Even this kind parts (emitter) might get damage in a car accident. The Mechanic will only order the same parts (emitters) from the original manufacture dealer to fix it and keep it working as normal (as the original parts--emitters) then who will know it? They surely can solve the problem and install it if they so desire.

Right now, I would like to tell a true story here, the role of the story is a lady.

This lady I had mentioned before in my article who is a victim of the Mind machine in Taiwan.

She moved to Maryland after she recovered from the hospital in Taiwan. She told us few times that she heard someone talked in her ears (actually it's delivered words to her brain by the mind machine operator.) either she was by my friend's car or my relative's car.

(She was determined as a insane by the machine operators of Taiwan so they lock her where she will go even at home. Also the operators deliver words to her with a bad intention. They try to make others truly believe that she is crazy because nobody will hear any word in the same car.)

Another experiences of victim is a man. He told me that he was shot by the electric waves (it like a bee-sting.) few times either he by bus or by car of his friend.

I figured out it as that the emitter should be connected with the car battery by specially wire. The electric power is always on

and no need to turn on the ignition system. This just like you can horn or turn on the high beam without turn on the ignition system of car. Also this emitters can be remotely controlled because the light poles always beside the road or around the parking lots.

I had found the hexangular metal in axis of steering wheel and it might can increase the electric field.

I found it because I doubt this area can emit the electromagnetic waves. That's because I have few experiences on suddenly falling in dizzy situation and once is very clearly.

The clear experience was that I drove to pick up my young kid who's later at school. The distance is very short only about 15 minutes in driving time. When I drove at halfway I suddenly felt that I almost fell in sleep (a feeling of lethargy). I know this is very unusual and use a metal plate covered on the steer wheel (covered the horn) then this feeling gone. I reacted as that because it's the fast way to block any emitter which might exist to emit EMR waves to my brain. After that then I found the hexangular metal.

The above event are facts & true. I can swear it under the name of God.

The above information make me believe that the Mind machine might have been installed in cars for a long time.

These few agents use the mind machine operators to build a martial law in cars or even in the country. They're not officers also can't stand for any agency. Surely they can't stand for the government but criminal suspect. That's because they already violate the US constitution if they really have installed the emitters of mind machine in cars.

Also the threat to everyone is that they always carry their radiation waves weapon when they spy you. This will promise immense danger to our society.

The above information were known by me for the past ten more years. What I am concerned is the way that this mind machine (Mind Reading Machine) could & had already been abuse as above. Also they have three steps to get rid of a subject, the first step is to drive people mad, if it's failure then the second step is to make the car accident on high way, the last step is to open the hidden radiation waves emitter (already installed with the surveillance system in entire nation.) to hurt the subject slowly die or hurt the subject in any place to kick off the subject from the society.

So it not only can read the thoughts of people and invade his privacy without permission. It also already be operated as high level electromagnetic waves as a weapon to hurt, punish, threaten, or even kill the subjects whom are out of their control or they don't like. And if any operator has political ambition, he/she can get rid of any high power political person by the invisible radiation weapon with the surveillance system. Also nobody check the loyalty or thoughts of the operators.

Since this machine had already been used efficiently in Taiwan. It should be used more effectively and efficiently in the United States -where it was originally invented. In the past ten years, they may already include this machine in the city design and have been using the machine from the city, county to the states of the whole country.

Then this machine might have been installed in all public buildings, such as shopping centers, schools, supermarkets, bank, airports, etc, also include the vehicles. (The main intersection of street, the shoulder of highway might have installed the electrical receiver.) The law abiding citizens

will be totally under their control wherever he/she goes? Also our congress members will meet the same situation because the surveillance system is true and fair to anyone.

If the above situation is correct, then the power of machine operators already extend to the maxims. They can hurt anyone or even get rid of anyone but won't be held by law because there is no any trace of evidence with their radiation waves weapon.

Their power will be unstoppable. Nobody can control or stop them when they make mistake or even do something against law or if any operator has political ambition he/she can get rid of any important political person. Who will check the operators' loyalty and read their thoughts?

No any place is safe and that's including our personal home. We will have no privacy and shall forever be threatened by high frequency electromagnetic radiation.

I truly hope that our responsible citizens will have knowledge of such machine. If some of the agents of authorities of our country had been using this machine to investigate our citizens just like Taiwan. I hope you will look into this event and take action so that laws can be made to regulate this machine.

I would like to suggest you that ask Mr. President release the mind machine-"TRM" secret (Because the mind machine owner-CIA always irresponsible deny, we can ask them do nothing.) and let the machine be used in open way. Let the representatives and Congress check the actions & works of machine operators as a routine job.

Then our citizen's rights and all people's rights which include the privacy rights and our human rights will soon give back to us.

Finally, I would like to let you know that how could you know that they use the electro-magnetic waves to detect your thoughts.

I'll offer some hints to you to find out if you are or had been investigated by this machine.

Of course, you should be in normal condition without health problem, no over work, no emotional stress (such as lose love one), no special personal problem, then you can use the tips. It's as follows:

1. When you're dreaming, you suddenly think about or recall events (people or things) which happened many, many years ago (even more ten or twenty years before). The dream of a person should relate with what he did, whom he met, what he try to recall in the day or before he go to sleep.
If your dream didn't connect with above situation but suddenly think the events (things & persons) which happened many, many years ago.
The dreams don't belong to you. It might the operator use the machine to read your history through your recalling in dream.
2. If you feel easily to make the day-dream than usual or suddenly change your regular sleeping time to go to the bed at irregular time. If the sleeping time which always accompany with lots dreams, the machine might work on you.
3. If you work alone in office or at home, your brain can't stop think other things which is absolutely disconnected with what you're doing. This kind thinking should be very mess. If you try to stop the trail of thoughts but can't do it. These thoughts aren't yours. It just like a guy flipping the book to find the page which he needs. The operators might be searching the information from your thoughts. (Except it is your intention from personal

problem or special emotional stress.)

4. After you go to the bed, you easily fall to deep sleeping than usual and can't easily wake up as usual. This situation always accompany with lots dreams.
5. Your recent sleeping time had been longer than usual but you still feel tire or dizzy.

If it accompany with lots dreams then the machine might work on your thoughts. But, if there is no dream, the most terrible thing is, the operators of the machine might use the electromagnetic waves to hurt you.

Sincerely Yours,

Alan Yu

** About Author & why do I want to talk about the EMR mind machine?

My major is in finance and not in science. When I graduated, I was the first of my class (quartermaster) from the finance & quarter school of Taiwan's Army.

I handled the classified document mentioned in this article when I was a lieutenant colonel of Taiwan's National Defense Department in 1984. The document indicated that the Taiwan's Military Police Department request to order the parts of this machine (for maintenance purposes).

At that time, I was serving at the highest audit center for Taiwan's military budget, and it was my jurisdiction to audit classified and unclassified military spending. In addition, my yearly evaluation was "A" at that time, and I maintain the same level of performance until I retired.

I had seventeen years experiences in military service. When I retired, I received the award of "Loyalty & Dedication" with both signatures of Minister of Defense and the President of R.O.C.(Taiwan).

** Some people had said to me that if the EMR mind machine indeed exist, it would also be classified, and you would be violating your security clearance to talk about it. So quite frankly, what you are saying about a Thought Reading machine would be qualify as treason for you.

Well, discussing this secret with the general publics is not treason, but it may be a violation of the military security regulations if I were still a citizen of Taiwan. Since I have naturalized as a citizen of USA and no longer of a military officer of Taiwan for a long time, I can discuss any military secret of Taiwan legally if I so desire. But, I didn't do that, and I do know numerous of Taiwan's military secrets. This is because to talk about these secrets will be an act against my conscience. The only exception is the "Mind Reading machine".

Now, I would like you to know why I am discussing this machine. My purpose of talking about this machine is not only because it reads people's thoughts and violate people's rights to privacy (which it does). What prompted me to come forward with this information is the cruelty of some of the operators of this machine.

They are not public servants as any governmental officer should be. Instead, they believe they are above the law and the master of the people which they investigate. These operators uses electromagnetic radiation (EMR) waves to harm people whom they do not like. Sometimes, they use the machine to drive other people mad; this is because the operators cannot predict these people's behaviors. These operators could also cause car accident to finish them off as another alternative. But these victims are human beings, and they didn't break any law. These operators believe that they have the rights to change the other people's lives if these operators so desired.

It only because most people still do not know such machine existed and no law had been made to regulate this machine and the operators. Such things may be not known by the machine inventor, but it is this type of abuse human lives which prompt me to come forward.
